

About the Multi-Source Inventory [MSI]

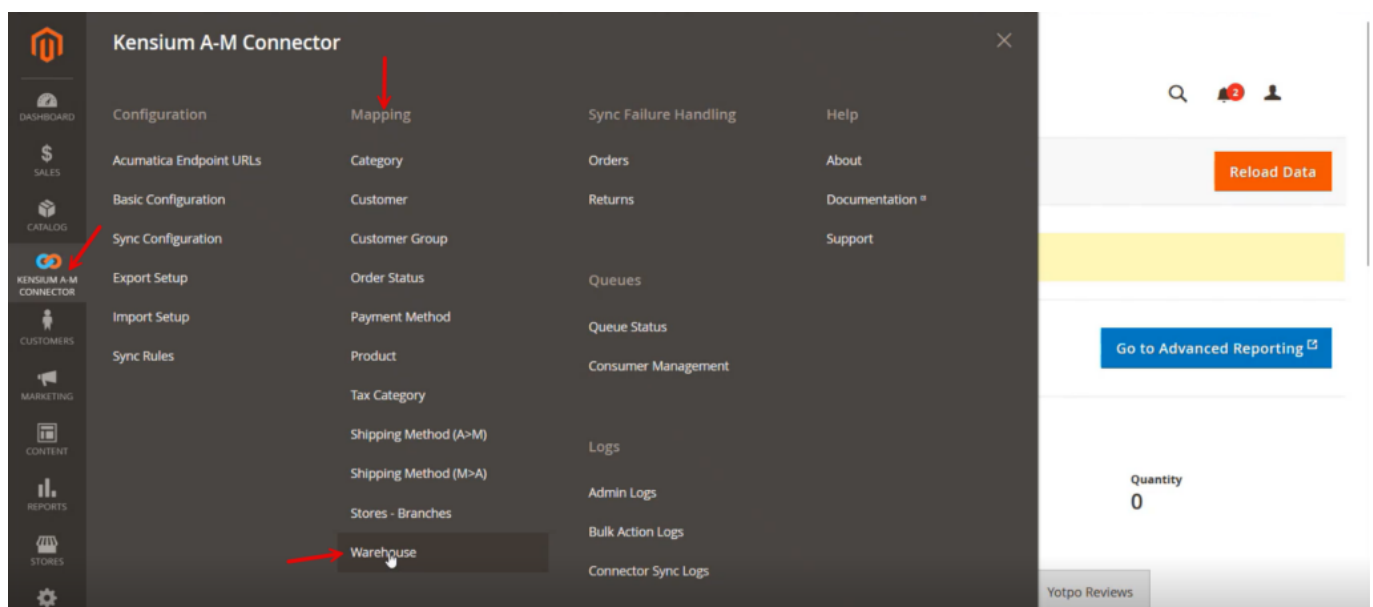

If you have multiple warehouses and you want to maintain the quantity of the product based on the warehouse you must create different stock and different sources.

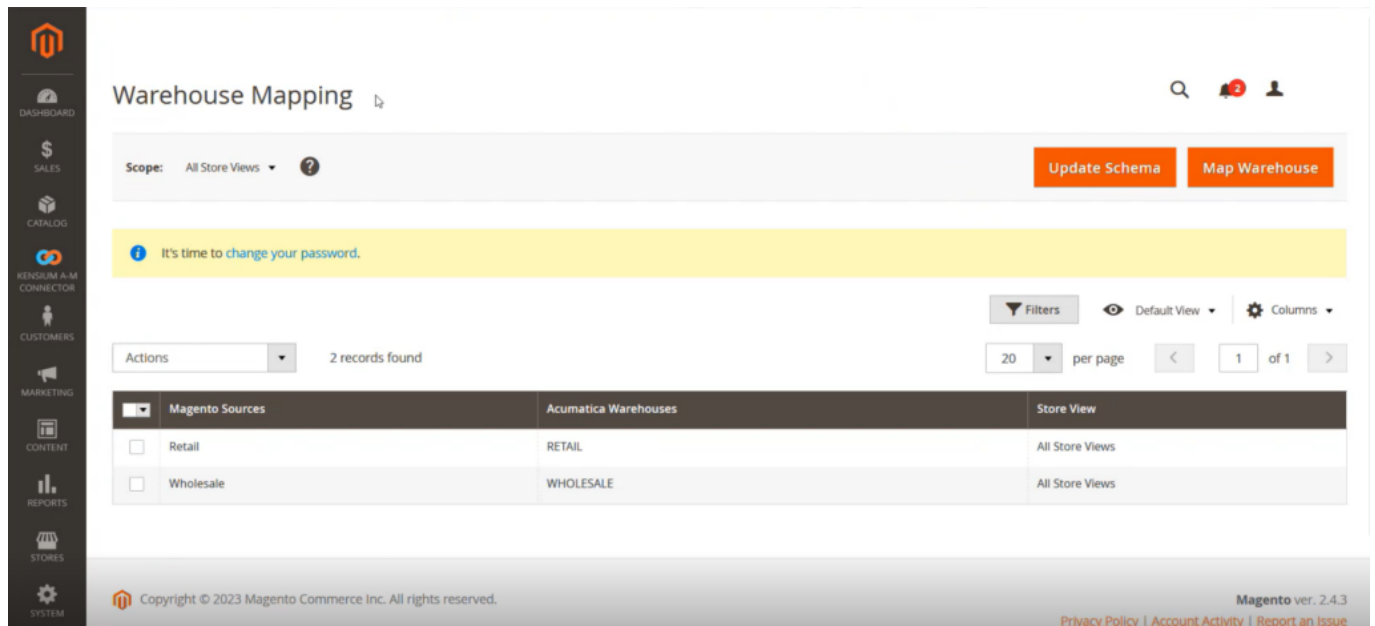

Note that the MSI module should be installed in Magento separately.

Go to the Kensium AM Connector Data you will be able to see [Warehouse] under the mapping section.

Upon clicking the [Warehouse] you will be redirected to the following screen.

Warehouse Mapping

Scope: All Store Views

Update Schema Map Warehouse

It's time to change your password.

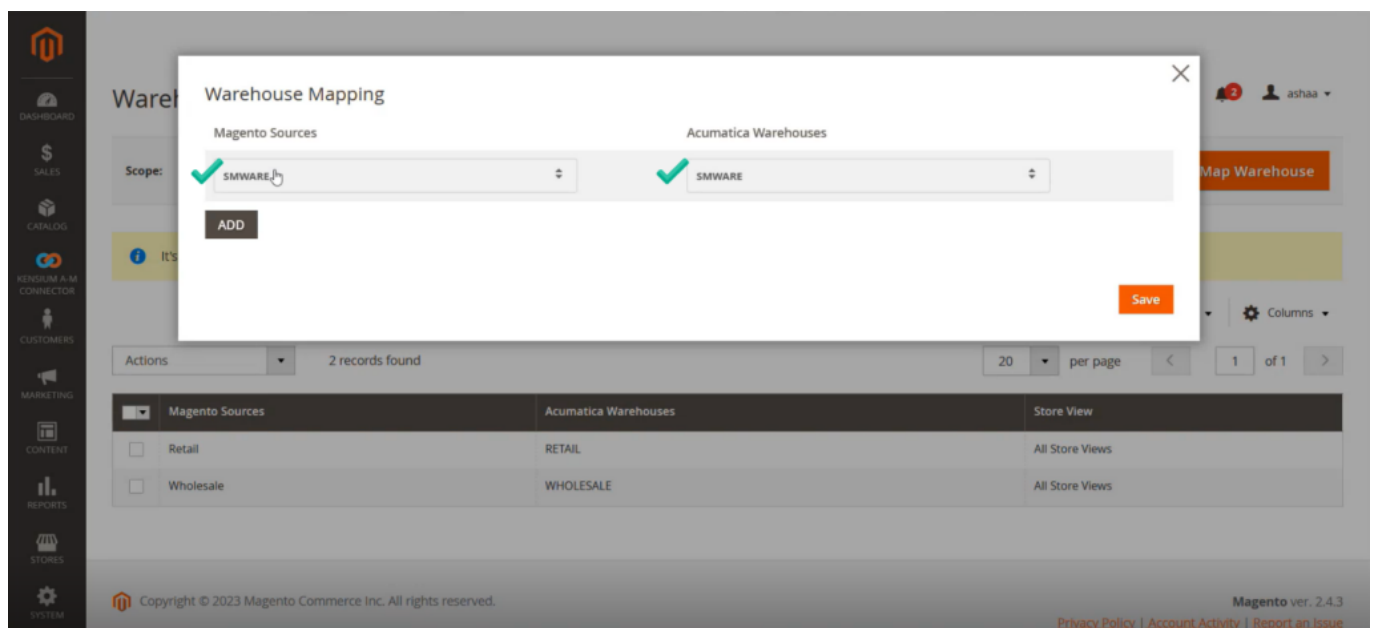

Filters Default View Columns

Actions 2 records found 20 per page 1 of 1

Actions	Magento Sources	Acumatica Warehouses	Store View
<input type="checkbox"/>	Retail	RETAIL	All Store Views
<input type="checkbox"/>	Wholesale	WHOLESALE	All Store Views

Warehouse Mapping screen

In the Warehouse within the product, it will give you the details of the segregated values of the products warehouse-wise.

The screenshot shows the 'Tiles QA' interface. A table displays source item status and quantity for 'Retail' and 'Wholesale' categories. The 'Retail' row shows 'In Stock' with a quantity of 19. The 'Wholesale' row shows 'Out of Stock' with a quantity of 0. Both rows have a 'Notify Qty' of 1 and a 'Use Default' checkbox checked. The 'Actions' column for both rows has an 'Unassign' link.

Name	Source Status	Source Item Status	Qty	Notify Qty	Actions
Retail	Enabled	In Stock	19	1	Unassign
Wholesale	Enabled	Out of Stock	0	1	Unassign

The screenshot shows the 'Warehouse Mapping' interface. A table displays the mapping between Magento Sources, Acumatica Warehouses, and Store Views. The 'Retail' source is mapped to 'RETAIL' warehouse and 'All Store Views'. The 'Wholesale' source is mapped to 'WHOLESALE' warehouse and 'All Store Views'. The 'SMWARE' source is mapped to 'SMWARE' warehouse and 'All Store Views'.

Magento Sources	Acumatica Warehouses	Store View
<input type="checkbox"/> Retail	RETAIL	All Store Views
<input type="checkbox"/> Wholesale	WHOLESALE	All Store Views
<input type="checkbox"/> SMWARE	SMWARE	All Store Views

So, you can display the product quantity against the Warehouse as well as consolidated product quantity.

	<p><i>Note that, for Magento Admins for MSI they can view the quantities. This can only be done because of the mapping of the warehouses.</i></p>
