

# Establishing Category Sync Schema

You need to navigate to the Magento Connector workspace and select Category under the Schema Management section.

The screenshot shows the Acumatica interface with the Magento Connector workspace. The 'Product' section is active, and the 'REFRESH SCHEMA' button is highlighted with a red box. The 'GENERAL SETTINGS' tab is selected, showing a list of schemas with checkboxes for 'Active' and 'Display Name'.

Active	Schema Name	Display Name
<input checked="" type="checkbox"/>	Stock Item Summary	Inventory ID
<input checked="" type="checkbox"/>	Stock Item Summary	Description
<input type="checkbox"/>	Stock Item Summary	Product Workgroup
<input type="checkbox"/>	Stock Item Summary	Product Manager
<input type="checkbox"/>	Stock Item Summary	Product Manager Contact
<input type="checkbox"/>	Stock Item Summary	chEquipmentManagement
<input type="checkbox"/>	Stock Item Summary	Note Text
<input type="checkbox"/>	Stock Item Summary	Add Pop-Up Note
<input type="checkbox"/>	Stock Item Summary	Pop-Up Note Text
<input checked="" type="checkbox"/>	General -> Item Defaults	Item Class
<input type="checkbox"/>	General -> Item Defaults	Type
<input type="checkbox"/>	General -> Item Defaults	Is a Kit
<input type="checkbox"/>	General -> Item Defaults	Valuation Method
<input checked="" type="checkbox"/>	General -> Item Defaults	Tax Category
<input type="checkbox"/>	General -> Item Defaults	Posting Class

Refresh Schema before toggling on and off schema for sync.

Follow the steps as mentioned below:

1. Click Refresh Schema.
2. Select the tab of schema to enable. The tabs are:
  - a. Category Info
  - b. eCommerce
3. Toggle the Active box for all Schema and Display Names applicable.
4. Click **[Save]**.

The selected schema will be active for syncs between Magento and Acumatica.
