#### Sync Rules:

The application allows you to set sync rules. The rule applies to the process of synchronization of orders. Under the Kensium A-M Connector, the Sync Rules option is available under the Configuration menu as shown in the figure below.

Sync Rules option in Configuration in Kensium A-M Connector

You can add sync rules from this section by clicking on [Add New Rule].

The Add New Rule section is divided into the following:

- 1. General Information
- 2. Conditions
- 3. Actions

#### Add a sync rule.

- 1. **General Information:** In the General Information section, you need to enter the following field-level information.
  - a. Name: This is a mandatory field. You need to set the rule name.
  - b. Description: You can write a general description for setting the rule. For example, if there is a negligible difference in the price of the product you can write in the description section. *This is an option field*.
  - c. Entity: This should be by default Order. Since the sync rule applies to the order only.
  - d. Directions: This field is mandatory, however, doesn't require manual entry or selection. The data sync direction is set from Magento to Acumatica by the application.
  - e. priority: You need to set the priority of the Order synching from Magento to Acumatica.
  - f. Active: This should always be enabled. Toggle the button to enable. This is mandatory to set the sync rule.

See below:

#### General Information section on expanding

2. **Condition:** This is an important section where you can apply the condition for the sync rule. You need to define the conditions that need to be met to set the sync rule.

Condition section after expanding

If you leave the condition blank the rule will not be applied by the application.

• You can add the condition by clicking on the sign if all these conditions are true. The application will provide you with the following options to choose from the drop-down.

#### Conditions

×

Apply the rule only if the following conditions are met (leaving blank will not apply the rule).

If ALL of these conditions are TRUE :

The above options are available to choose from in the drop-down.

- Condition combination:
- *Connector Attributes:* Connector Attributes refer to the specific characteristics or properties that are utilized to establish a connection between Magento and Acumatica.
  - *Sync Exception:* You will get this option under Connector Attributes. After selecting the Sync Exception, the application will allow you to write the condition in the text box as shown below:

## Conditions

Apply the rule only if the following conditions are met (leaving blank will not apply the rule).

If ALL of these condit	ions are TRUE :	
Sync Exception is		8
۲		

Sync Exception in Connector Attributes

- 3. Actions: You can take any of the following actions based on the condition. You have to choose the action based on certain conditions.
- Retry Order Sync: In case you want to retry the order sync.
- **Retry Order Sync with Non-Stock Items:** In case you want to retry the Order Sync with the Non-Stock items, you need to select this option. The application will ask to enter the non-stock item ID in this scenario.

Actions 📝

×

Apply *	Retry Order Sync With Non Stock Item	•	
Non Stock Id *			

- Stop Automated Order Re-Sync: This will stop the automated order re-sync.
- **Stop Automated Order Re-Sync And Send Mail:** This action will stop the automated order resync and you will have an option to send an email to the contact. The following sub-field will appear on the screen, and you need to enter the information for all the mandatory drop-down and text fields.
  - **Email sender:** Choose the email sender from the drop-down.
  - **Email Template:** By default, the application provides you with an Order Sync Exception Email.
  - $\circ\,$  **Email Recipient:** Enter the valid email address of the email recipient.

Actions 📝

Apply *	Stop Automated Order Re-Sync And Send Mail	•	]
Email Sender *	General Contact		
Email Template *	Order Sync Exception Email (Default)		
Email Recipient *			

• **Change Order Status:** You can change the order status from the drop-down menu. The following option is available in the drop-down.

×

• **Order Status:** Cancelled, Closed, Completed, On Hold, Payment Review, PayPal cancelled reversal, PayPal Reversed, Pending Payment, Pending, Pending PayPal, Processing, Rejected.

After completing all the steps to sync rule setup you will be landed on the following **[Sync Rule]** screen.
