

Substitution List in Acumatica

We created a new configuration screen to map the Magento and Acumatica Countries along with states. So Based on the entries the Data sync to Magento as well as Acumatica. In Customer Data Retrieval, Acumatica sends the mapped Magento country and state value through the API.

For Magento to Acumatica, Acumatica converts the Magento value into the mapped Acumatica value and saves the record in Acumatica.

To access the Substitution List in Acumatica you need to click on the Magento Connector on the left panel. Under the Configuration, you will find the option for **[Substitutions List]**.

The screenshot shows the Acumatica user interface for the Magento Connector. The top navigation bar includes a search field, a refresh button, and user information (Revision Two Products, Products Wholesale, 10/12/2023 12:33 AM, admin admin). The main content area is titled 'Magento Connector' and is divided into several sections: Configuration, APIs, Real-Time Processes, Batch Processes, and Schedule Batch Process. The 'Configuration' section is expanded, showing options like 'Setup Parameters', 'Initialize', 'Magento Endpoints', and 'Manage Substitute Lists' (highlighted with a red box). The 'APIs' section includes 'Product Schema', 'Category Schema', 'Customer Schema', 'Product Data', 'Category Data', 'Customer Data', and 'Order Data'. The 'Real-Time Processes' section includes 'Get PM instance', 'Product', 'Status', 'Price', 'Inventory', 'Sales Price', 'Update Kit Qty', 'Update Product Dependencies', 'Refresh Sales Prices', 'Category', 'Customer', 'Sales Order', 'Order Status', 'Sales Order Update', 'RC Order Update', 'Shipment', 'Magento Connector Queue Moni...', and 'Clear Logs'. The 'Batch Processes' section includes 'Metadata', 'Product', 'Sales Prices', 'Category', 'Customer', 'Sales Order', 'Shipment', and 'Reprocess Failed Messages'. The 'Schedule Batch Process' section includes 'Product', 'Customer', 'Sales Order', 'Shipment', 'Initial Data Management', 'Product Data Initialization', 'Reports', 'Connector Logs', and 'Entity Sync Status'. A red arrow in the left sidebar points to the 'Magento Connector' icon.

Manage Substitute List

Upon clicking on the **[Manage Substitute List]** you will be redirected to the following screen.

Manage Substitute Lists

Substitute Type: Country

Acumatica Country	Magento Country
US	United States

Managing Substitute List (1)

If the Connector is unable to connect with Acumatica due to country code, you need to define the Country under the **[Magento Country]** and you need to define the Acumatica Country so that the connector can pass the value. The same is applicable for the States.
