

AMEX Extend for Acumatica

The AMEX Extend package provides an integration for Accounts Payable (AP) to utilize virtual cards to pay vendors. It leverages Extend and your AMEX business credit card details to create and distribute unlimited virtual credit card numbers.

NOTE:

Virtual credit cards are single-use. This increases your account security and control, protecting you from fraud or misuse.

Virtual credit cards are sent out instantly, and allow the sender to set spending limits and choose an expiration date.

AMEX credit cards require between 2-4 business days to settle card transactions. Transaction details cannot be pulled into Acumatica until after settlement.
