

Initialize the Connection

Once the configuration is complete you need to initialize the connector. To initialize the connector, you need to click on the **[Initialization]**. Click on the Commerce Connection and click on **[Initialization]** under Configuration.

Initialization screen under Configuration

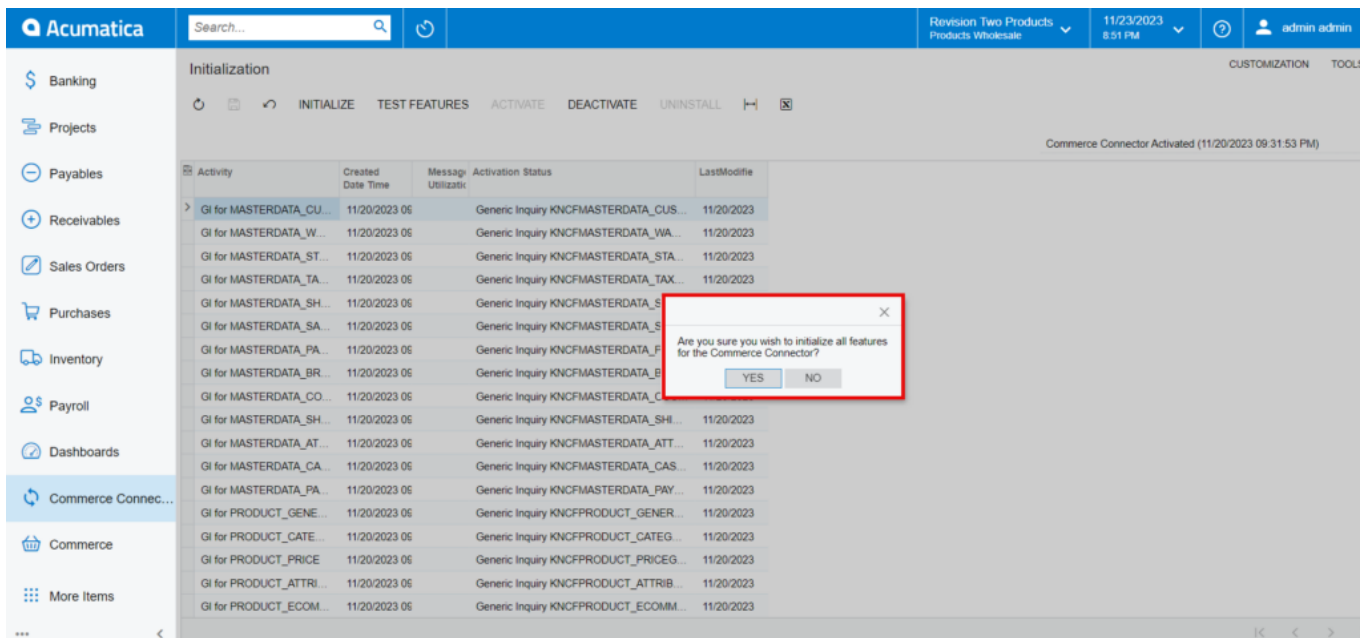

The screenshot shows the Acumatica interface with the 'Commerce Connector' module selected in the left sidebar. The 'Initialization' tab is active, and the 'INITIALIZE' button is highlighted with a red rectangle. Below the tab, a table lists various data entities and their activation status.

Option to Initialize

Upon clicking the initialization button, you will be redirected to the following screen.

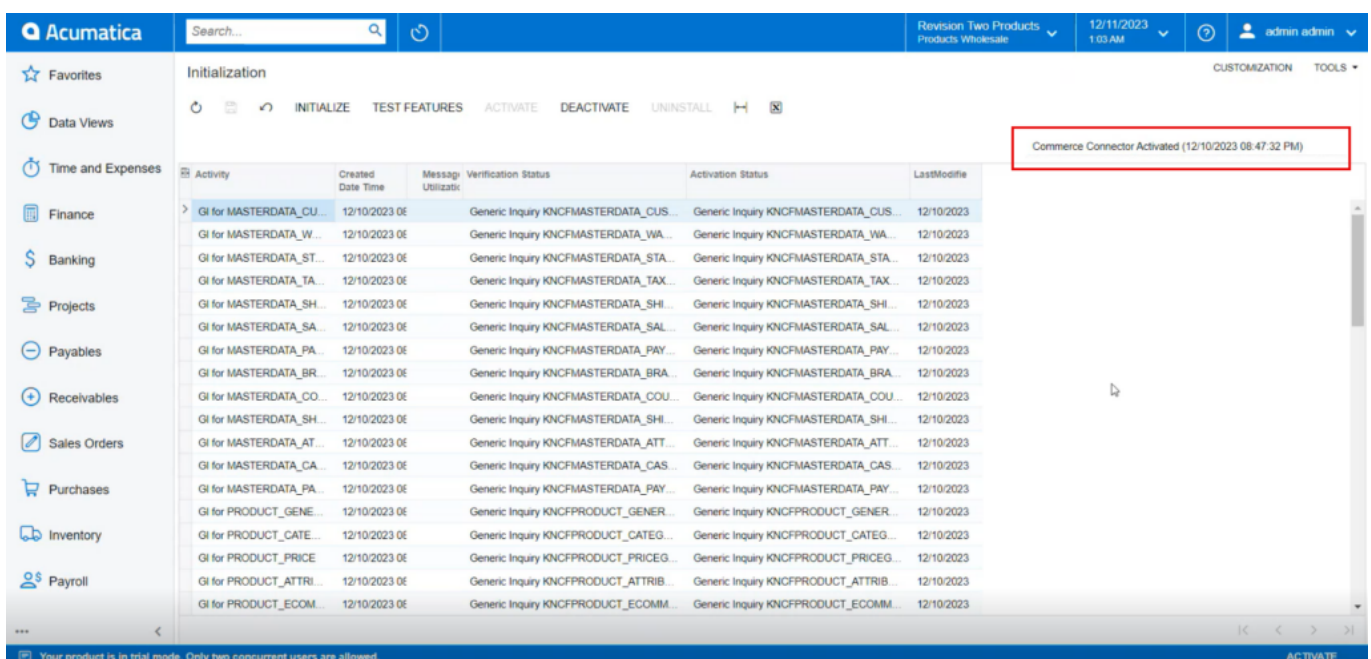

The screenshot shows the same Acumatica interface as before, but with a confirmation dialog box overlaid. The dialog box asks: "Are you sure you wish to initialize all features for the Commerce Connector?" and has two buttons: "YES" and "NO". The "INITIALIZE" button in the background is still highlighted with a red box.

Pop-Up for the Initialization

Upon clicking on [Yes] the initialization process will start. This will activate and initialize the scheduler for the same.

You will also have the option to [Deactivate], [Activate], [Uninstall], [Test Features].

During the process of Initialization, the GI [General Information] is created which needs to be added. If you perform any of the actions you will be able to view the action description along with the date and time stamp. The information is based on your last activity. For example, if you disable it will change and show the time and action type.

The screenshot shows the Acumatica interface with the 'Initialization' page selected. A red box highlights a message: 'Commerce Connector Activated (12/10/2023 08:47:32 PM)'. Below the message is a table with the following columns: Activity, Created Date Time, Message, Verification Status, Activation Status, and Last Modified.

Filter with KN.CF

 During the Initialization process the Activate column. These will be created at the time of Initialization. During Initialization this will only be created but you have to activate it separately by checking the box.

The screenshot shows the 'Automation Schedule Statuses' table in the Acumatica application. The table has columns for Status, Screen ID, Description, Active, Starts On, Expires On, Time Zone, Last Executed, Last Execution Result, and Next Execution Date. A red box highlights the 'Active' column, which contains checkboxes for each row. The rows represent various schedulers for different business processes, all with a status of 'Active'.

When you perform the [uninstall] action, this activated column is going to be deleted because you are cleaning the system and uninstalling the connector. So,

upon uninstalling all the GI, Push Notification and Activated schedulers are going to delete.
