

# Configuring KNCentralizedLicenseConsole

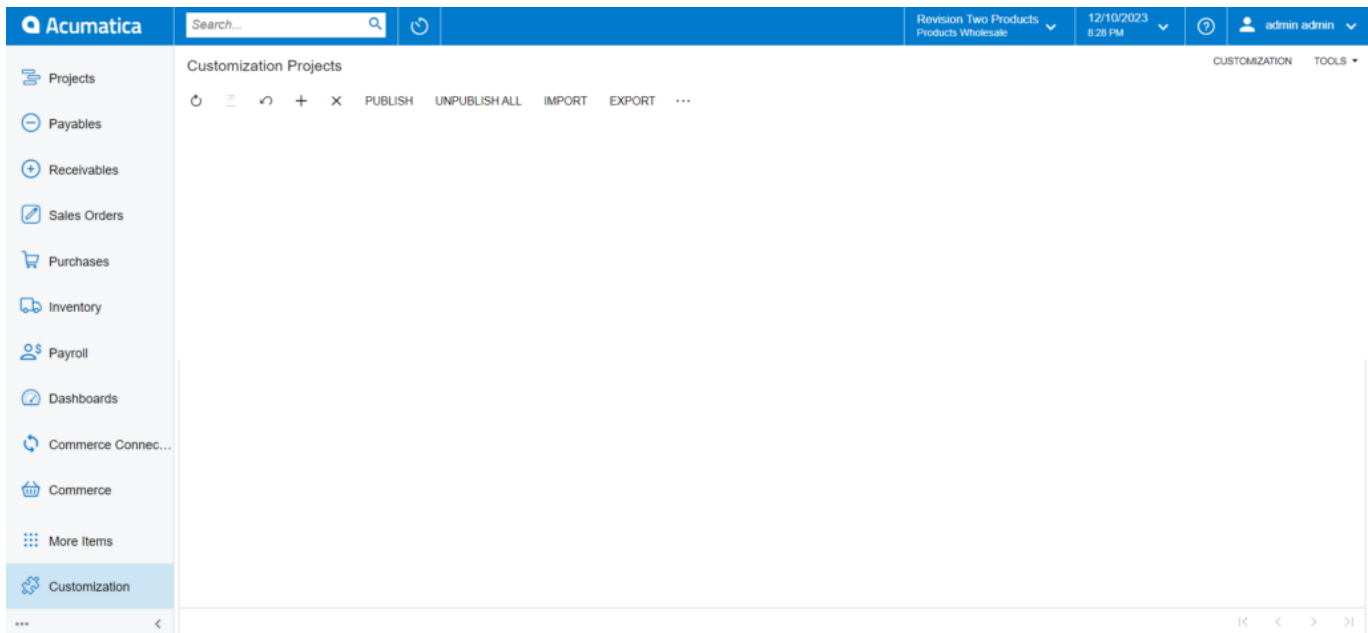

**Centralized License Console**, a potent solution for simplified license administration across our product line, is now **Available**. Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module, which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers:** The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages which are compatible with the new licensing engine.
  - A Clean-up Script will be run to remove all existing License tables.
  - The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

To configure the **[KNCentralizedLicenseConsole]**, you need to follow these steps.

- Save the .zip file of the **[KNCentralizedLicenseConsole]** package to the local hard drive.
- Click on the left panel in Acumatica and select **[More Items]**.
- Click on **[Customization]**, and you will be redirected to the Customization Projects screen.

## Customization Projects

- Click on **Import**, and a pop-up will appear on the screen.

## Upload the Zip File

- ✗ The file name will appear in the **[Project Name]** column.
- Select the checkbox/row of the project **[KNCentralizedLicense]**.
