

# Managing Customer Price Class

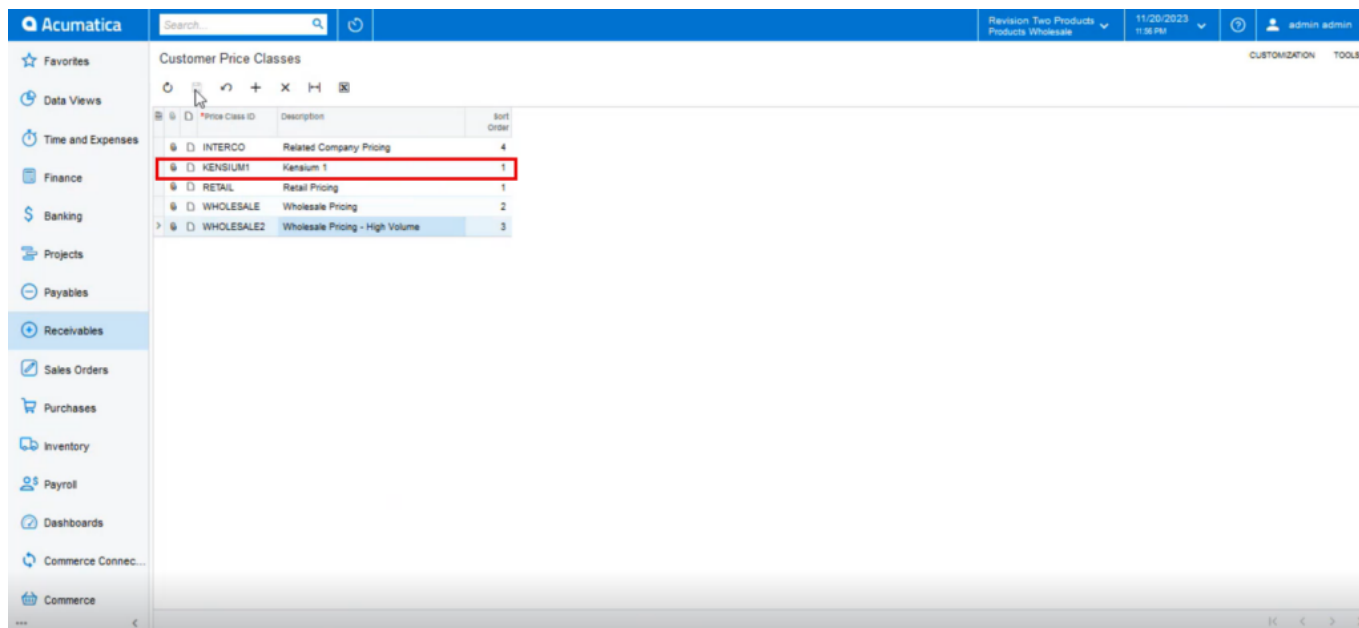

## Synchronization

To sync the customer price class, from Acumatica to B2B go to the **[Preferences]** in Acumatica. Upon clicking on the Preferences, you will be redirected to the Customer Class Screen.

The screenshot shows the Acumatica interface for the 'Customer Classes' screen, specifically for the 'KENSUM' customer class. The left sidebar contains navigation options like Favorites, Data Views, Time and Expenses, Finance, Banking, Projects, Payables, Receivables, Sales Orders, Purchases, Inventory, Payroll, Dashboards, Commerce Connect, and Commerce. The main area is titled 'Customer Classes KENSUM' and includes a search bar and a list of tabs: GENERAL, GL ACCOUNTS, DUNNING, ATTRIBUTES, and MAILING & PRINTING. The 'GENERAL' tab is active, showing various settings. The 'Price Class' field is highlighted with a red box. Other fields include Country (US - United States of America), Restrict Visibility To, Tax Zone ID, Entity Usage Type, Default Restriction Group, Salesperson ID, Customer Type, and various financial and delivery settings.

Customer Class Screen

You need to add the Customer Price Class as shown below.

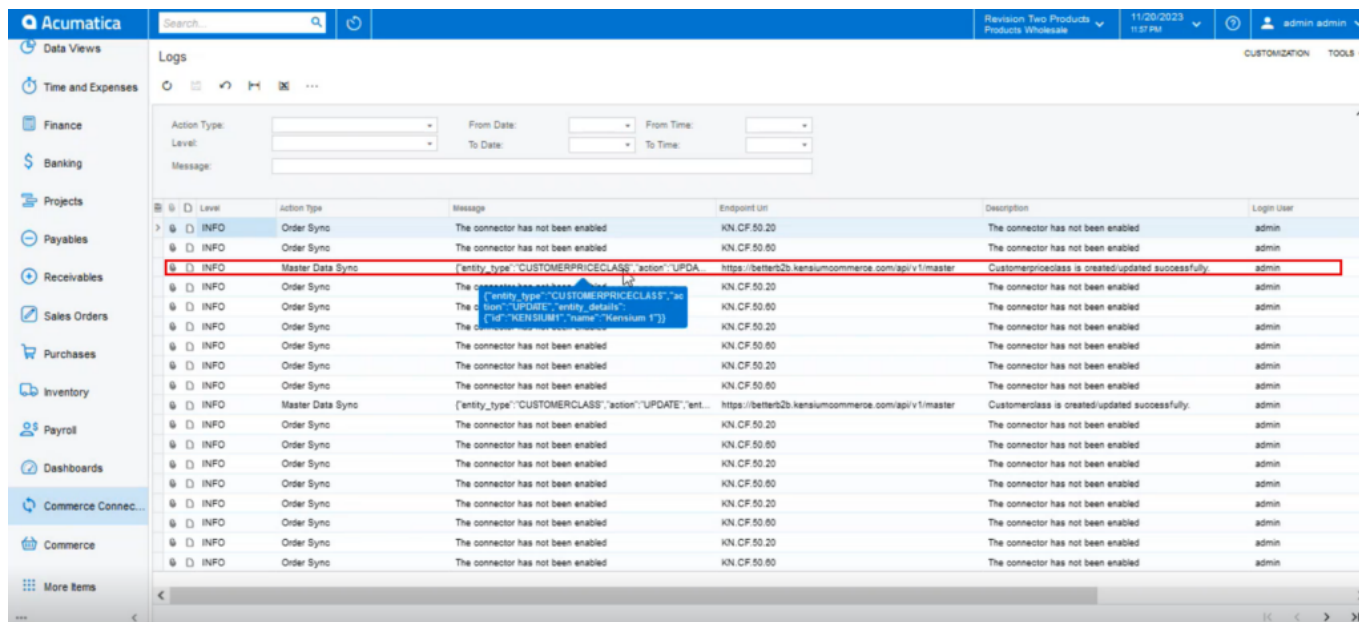

Customer Price Classes

Price Class ID	Description	Sort Order
INTERCO	Related Company Pricing	4
KENSUM1	Kensium 1	1
RETAIL	Retail Pricing	1
WHOLESALE	Wholesale Pricing	2
WHOLESALE2	Wholesale Pricing - High Volume	3

## Adding a Customer Price Class

Upon adding the **[Customer Price Class]** go to the Log screen under the **[Reports]**.
