

# Managing Master Data in BigCommerce B2B

The screenshot displays the BigCommerce B2B Admin interface. On the left is a navigation sidebar with a search bar and a list of apps, including 'Better B2B (Demo)'. The main content area shows a configuration page for 'Master Data'. The page has a top navigation bar with 'Companies', 'Invoices', 'Quotes', 'Payment Mapping', 'Users', 'Queues', 'Logs', 'Acumatica Configurations', 'Acumatica Connection', 'Acumatica Endpoint URLs', 'Kensium Commerce', 'Master Data' (selected), 'Queue Configuration', and 'Settings'. The 'Master Data' section contains a table with the following items:

Master Data	Action
Customer Class	...
Customer Price Class	...
Customer Status	...
Terms	...
Statement Cycle	...
Tax Zone	...
Entity Usage Type	...
Shipping Term	...
Sales Person	...
Shipping Method	...
Shipping Rule	...
Payment Method	...
