

Managing Payment Mapping

You can manage your payment mapping from the Better B2B app settings. The payment mapping includes the following:

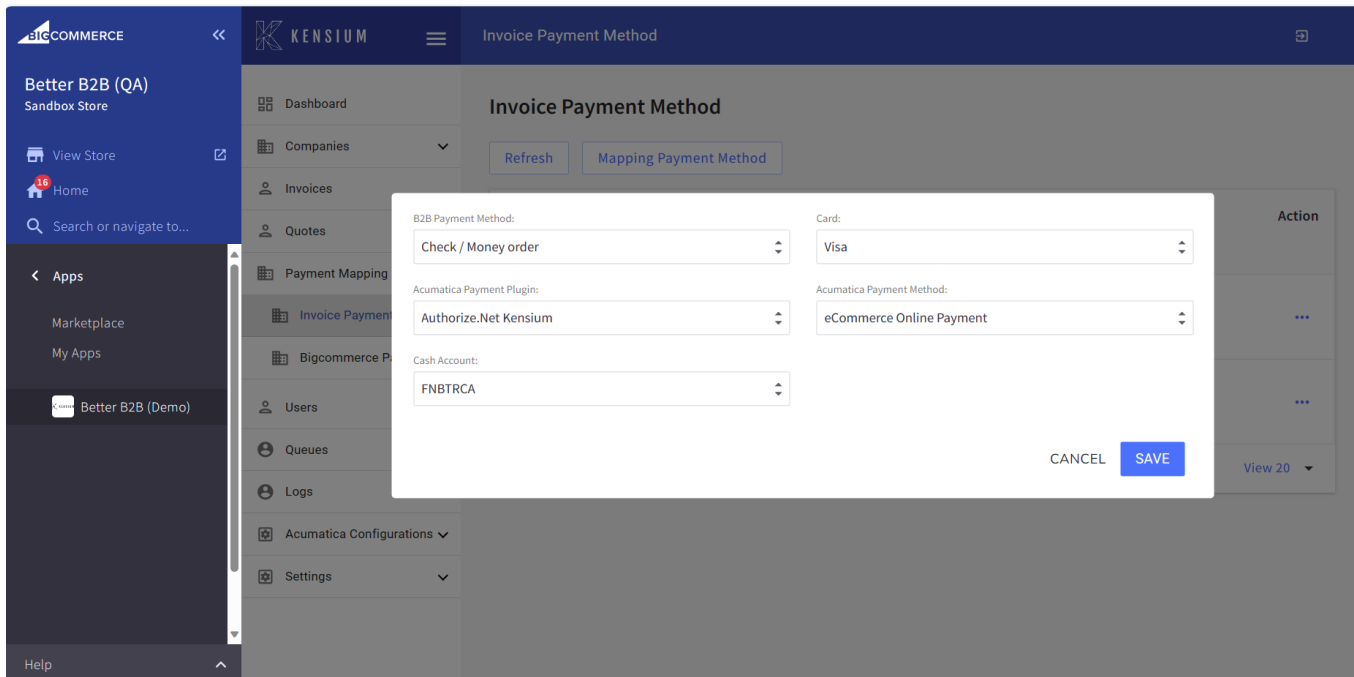

- Invoice Payments
- BigCommerce Payments

The screenshot shows the KENSUM application interface. On the left, a sidebar menu lists various options, with 'Payment Mapping' highlighted. The main content area is titled 'Invoice Payment Method' and contains a table of payment methods. The table has columns for 'B2B Payment Method', 'Card Type', 'Acumatica Payment Plugin', 'Acumatica Payment Method', 'Cash Account', and 'Action'. Two rows are visible, representing different credit card payment methods.

| B2B Payment Method | Card Type | Acumatica Payment Plugin | Acumatica Payment Method | Cash Account | Action |
|-----------------------------|------------|-------------------------------|--------------------------|---------------------------|--------|
| Credit Card (Authorize.Net) | MasterCard | Authorize.Net Tokenized (CIM) | MASTERCARD | Credit Card Account-10600 | ... |
| Credit Card (Authorize.Net) | Visa | Authorize.Net (API) | VISATOK | Credit Card Account-10600 | ... |

Options available under Payment Mapping

- **Invoice Payments:** If the invoice is synchronized from Acumatica to B2B the payment method will not be completed. So, you can directly make the payment in B2B from the front end. On the grid, you will have a couple of options like B2B Payment Method, Card Type, Acumatica Payment Plugin, Acumatica Payment Method, Cash Account and Action.
- Upon clicking on the **[Mapping Payment Method]** a smart pop-up will appear. You need to fill in the field-level values and save them.

The screenshot displays the 'Invoice Payment Method' configuration page in the KENSUM application. A modal window is open for mapping payment methods. The modal contains the following fields:

- B2B Payment Method:** Check / Money order
- Card:** Visa
- Acumatica Payment Plugin:** Authorize.Net Kensium
- Acumatica Payment Method:** eCommerce Online Payment
- Cash Account:** FNBTRCA

At the bottom of the modal are 'CANCEL' and 'SAVE' buttons. The background interface shows a sidebar with navigation options like Dashboard, Companies, Invoices, Quotes, Payment Mapping, Invoice Payment, Bigcommerce P, Users, Queues, Logs, Acumatica Configurations, and Settings. The main header includes 'BETTER B2B (QA) Sandbox Store' and 'View Store'.
