

Configuring KNCentralizedLicenseConsole

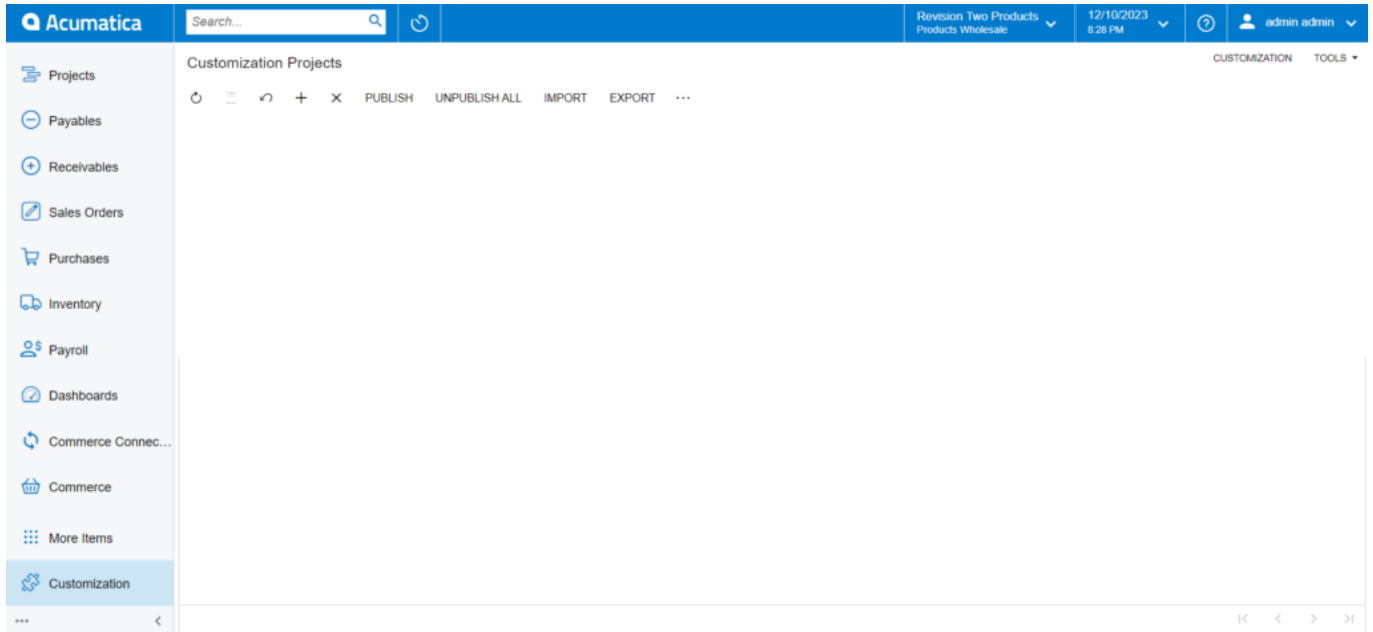

Centralized License Console, a potent solution for simplified license administration across our product line, is now **Available**. Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module, which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers:** The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages which are compatible with the new licensing engine.
 - A Clean-up Script will be run to remove all existing License tables.
 - The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

To configure the **[KNCentralizedLicenseConsole]**, you need to follow these steps.

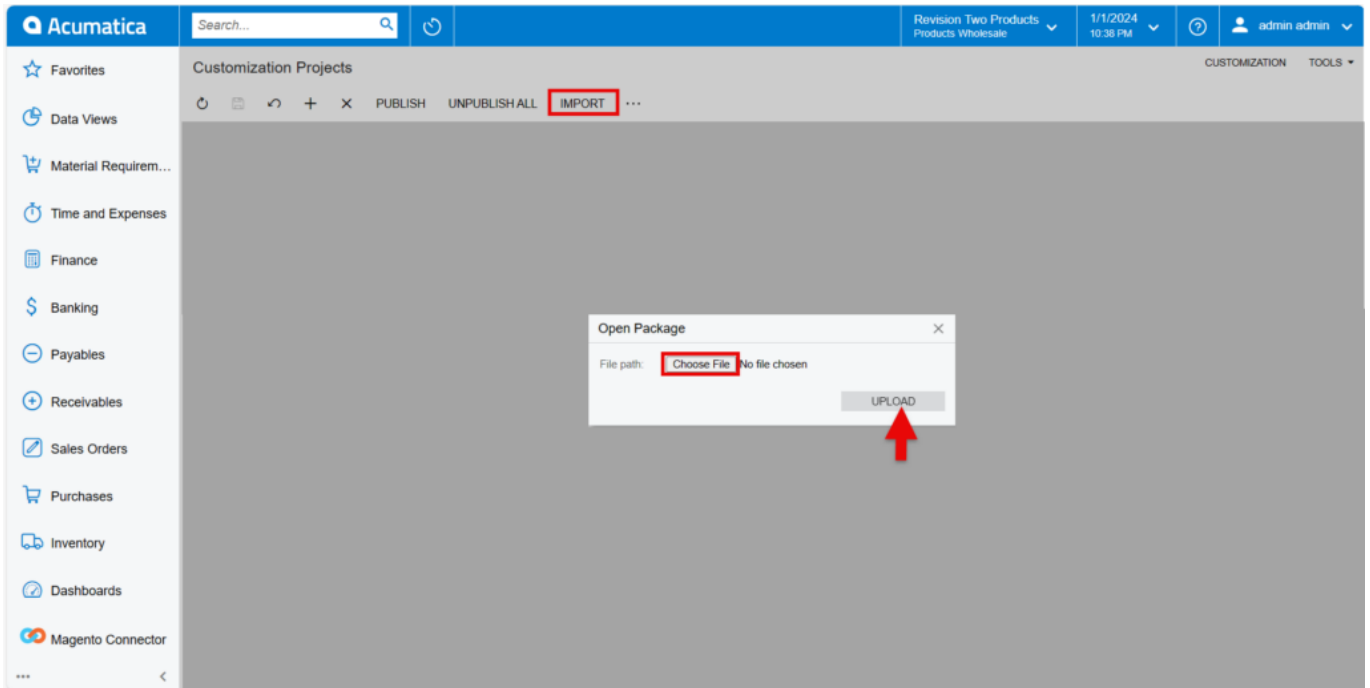

1. Save the .zip file of the **[KNCentralizedLicenseConsole]** package to the local hard drive.
2. Click on the left panel in Acumatica and select **[More Items]**.
3. Click on **[Customization]**, and you will be redirected to the Customization Projects screen.

The screenshot shows the Acumatica software interface. The top navigation bar includes the Acumatica logo, a search bar, and user information (admin admin). The left sidebar lists various modules: Projects, Payables, Receivables, Sales Orders, Purchases, Inventory, Payroll, Dashboards, Commerce Connec..., Commerce, More Items, and Customization. The main area is titled 'Customization Projects' and contains a toolbar with buttons for 'PUBLISH', 'UNPUBLISH ALL', 'IMPORT', and 'EXPORT'.

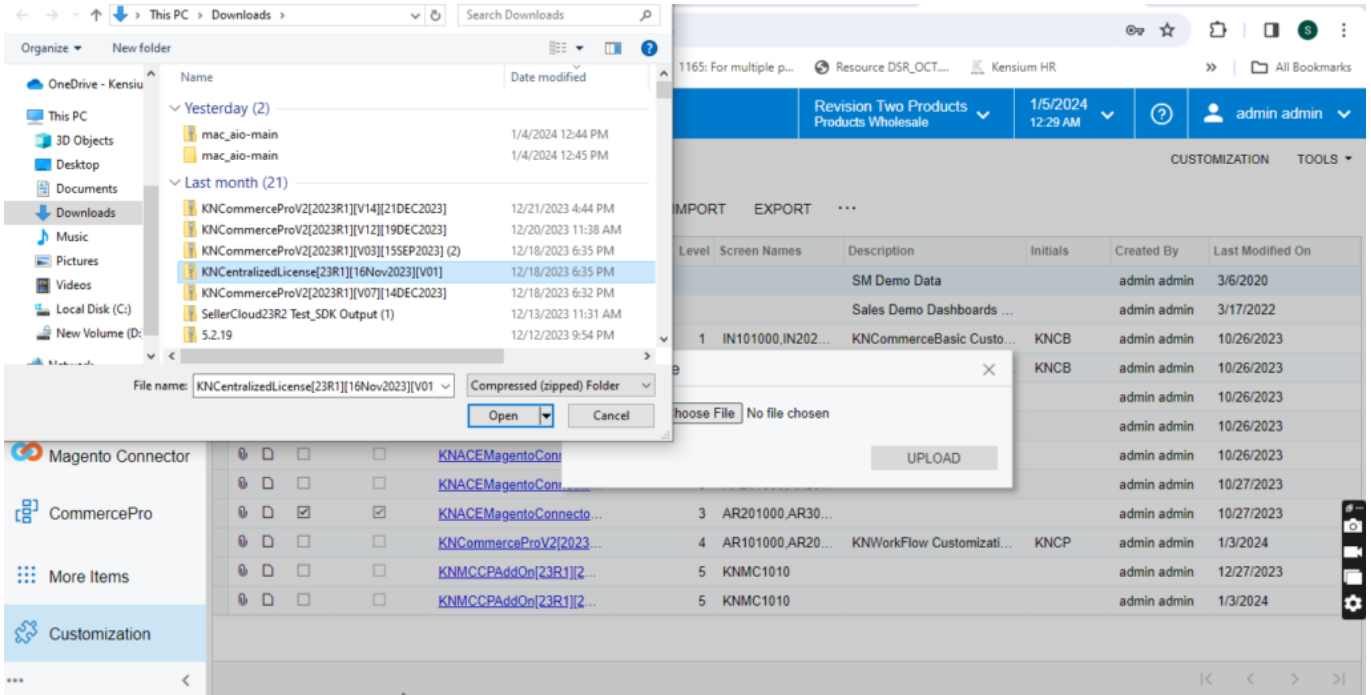

Customization Projects

- Click on **Import**, and a pop-up will appear on the screen.

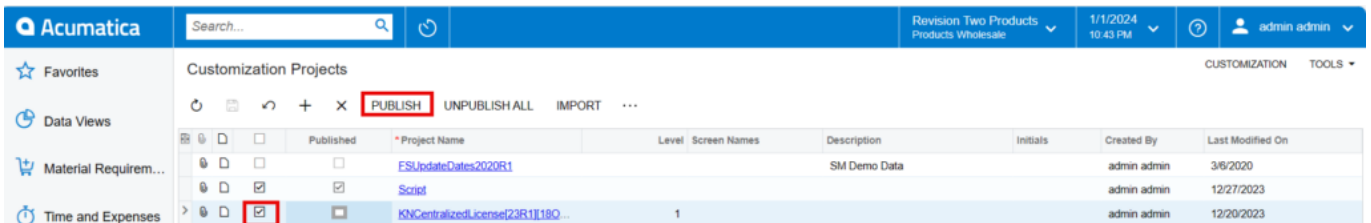

Customization Projects

- Select the [**KNCentralizedLicenseConsole**] zip file from the local system and click on [**Upload**].

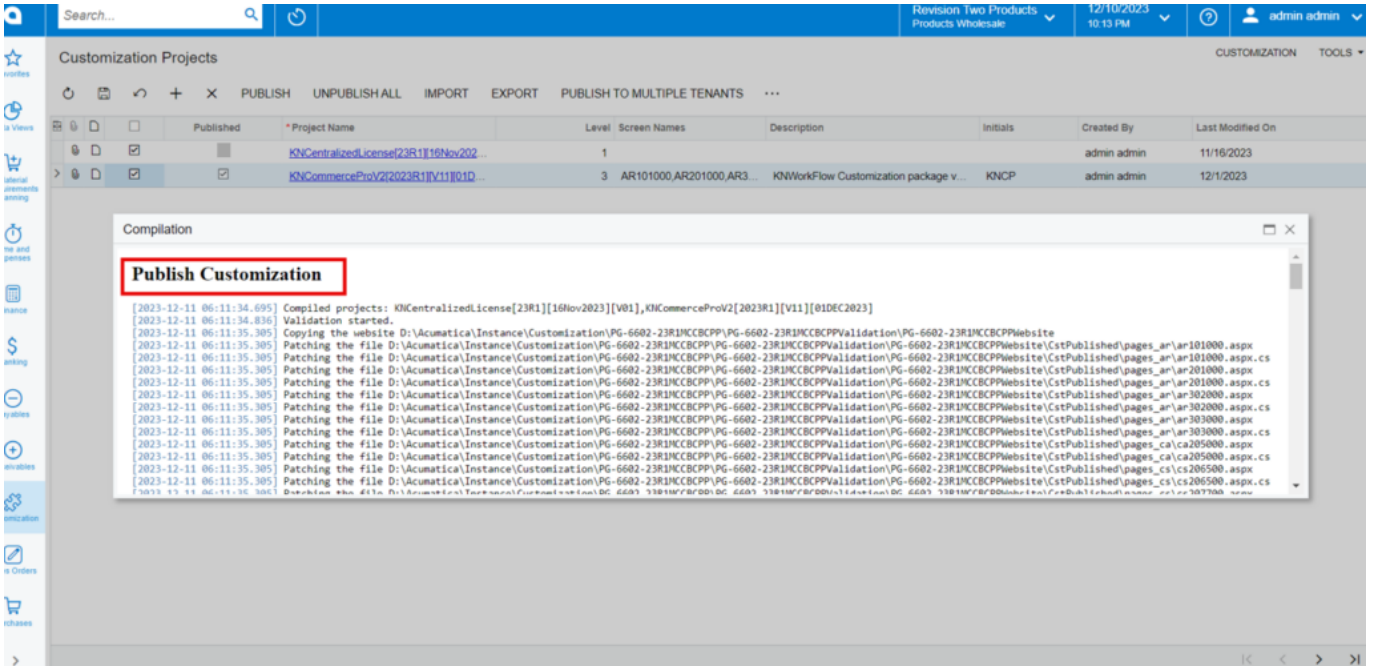

Upload the Zip File

- The file name will appear in the **[Project Name]** column.
- Select the checkbox/row of the project **[KNCentralizedLicense]**.

Click on Publish

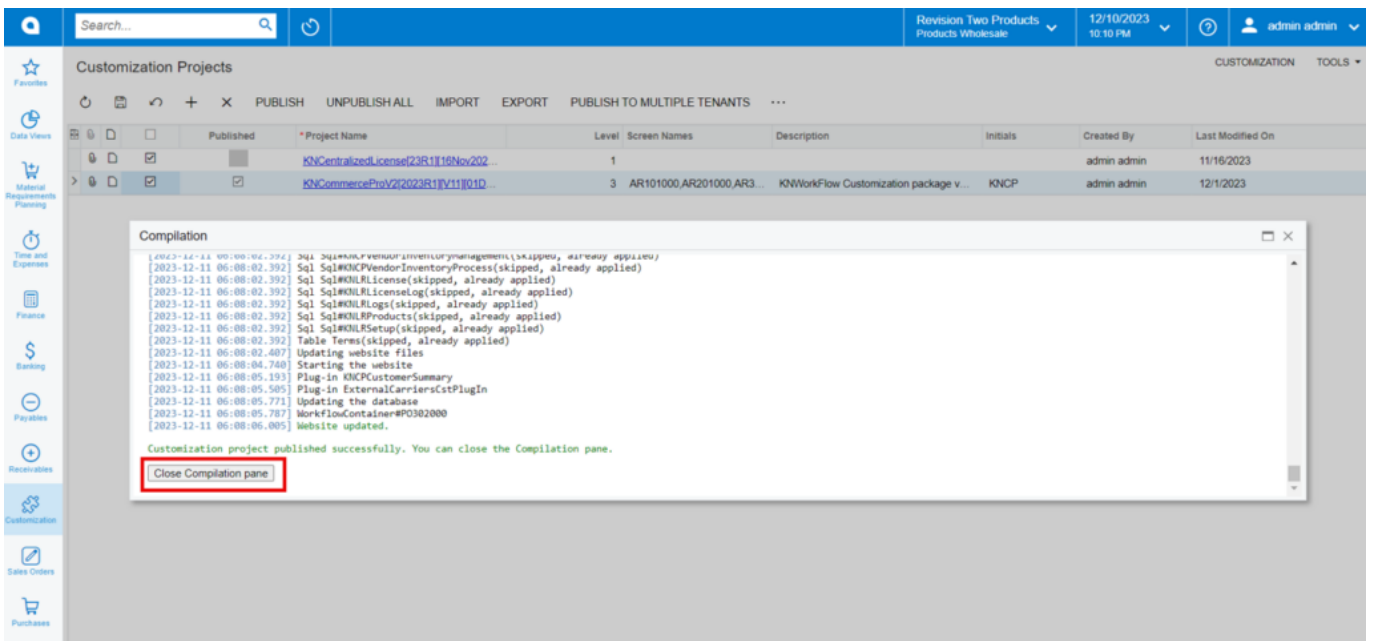

- Click on **[Publish]**.

The screenshot shows the Fusion software interface. At the top, there is a search bar and navigation icons. Below that, a table lists 'Customization Projects' with columns for 'Published', 'Project Name', 'Level', 'Screen Names', 'Description', 'Initials', 'Created By', and 'Last Modified On'. Two projects are listed: 'KNCentralizedLicense[23R1][16Nov2023]' and 'KNCommerceProv2[2023R1][V11][01DEC2023]'. A 'Compilation' window is open in the foreground, displaying a log of compilation steps. A red box highlights the 'Publish Customization' button at the top of the compilation log.

Publish Customization

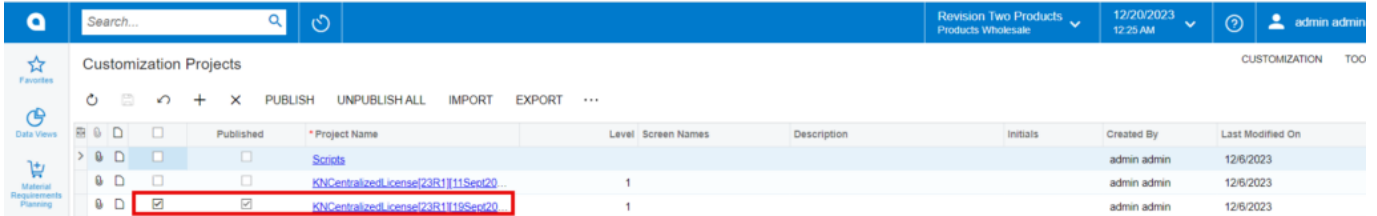

- Click on **[Close Compilation]**.

This screenshot shows the same Fusion software interface as the previous one, but the 'Compilation' window now displays a completion message: 'Customization project published successfully. You can close the Compilation pane.' A red box highlights the 'Close Compilation pane' button at the bottom of the compilation window.

Customization Projects

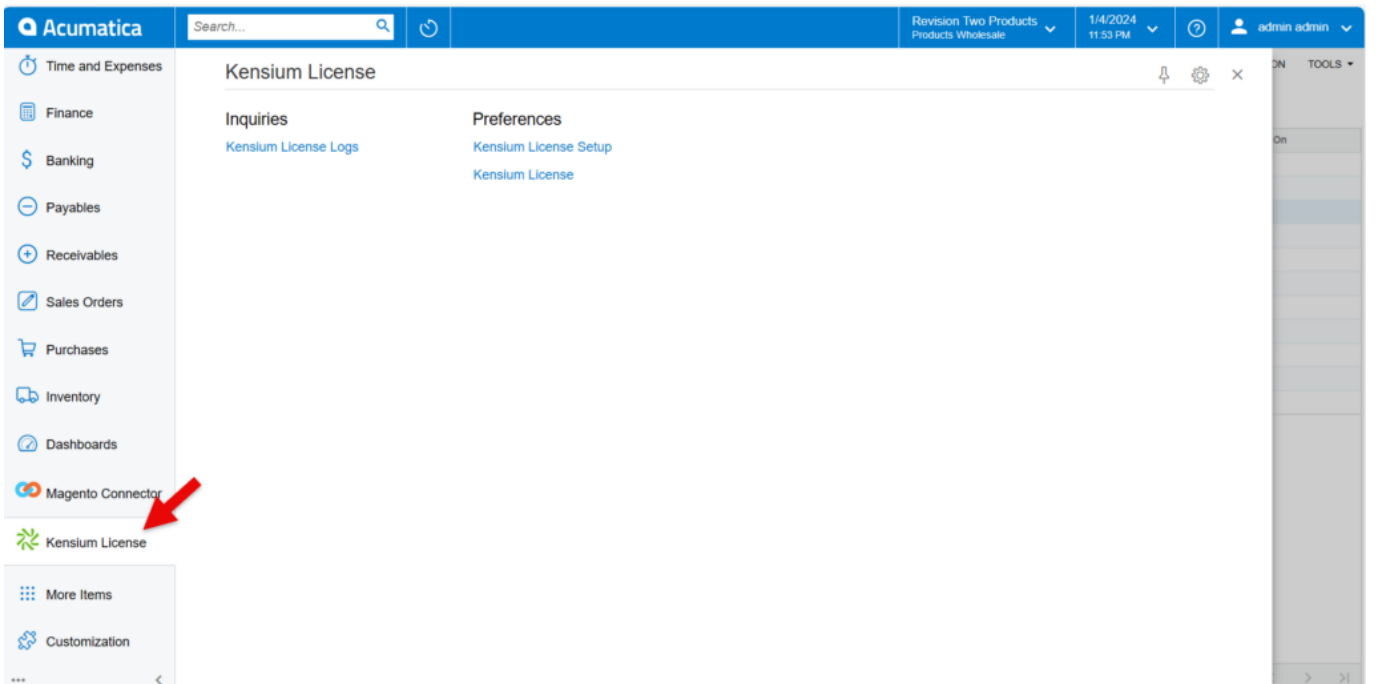

-  You can view the Published **[KNCentralizedLicense]** in the Customization Projects Column.
- You must Enable the check box.

Published	Project Name	Level	Screen Names	Description	Initials	Created By	Last Modified On
<input type="checkbox"/>	Scripts					admin admin	12/6/2023
<input type="checkbox"/>	KNCentralizedLicense23R1111Sep20	1				admin admin	12/6/2023
<input checked="" type="checkbox"/>	KNCentralizedLicense23R1116Sep20	1				admin admin	12/6/2023

Customization Projects

- Click on **[Save]** to publish the **[KNCentralizedLicense]** package to the Acumatica instance.
- Once the packages are published **[Kensium license]** will be available.

The screenshot shows the Acumatica software interface. The top navigation bar includes a search bar, a refresh icon, and user information. The left-hand navigation menu lists various modules: Time and Expenses, Finance, Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, Magento Connector, **Kensium License** (highlighted with a red arrow), More Items, and Customization. The main content area displays the 'Kensium License' module with sub-sections for 'Inquiries' (Kensium License Logs) and 'Preferences' (Kensium License Setup, Kensium License).
