

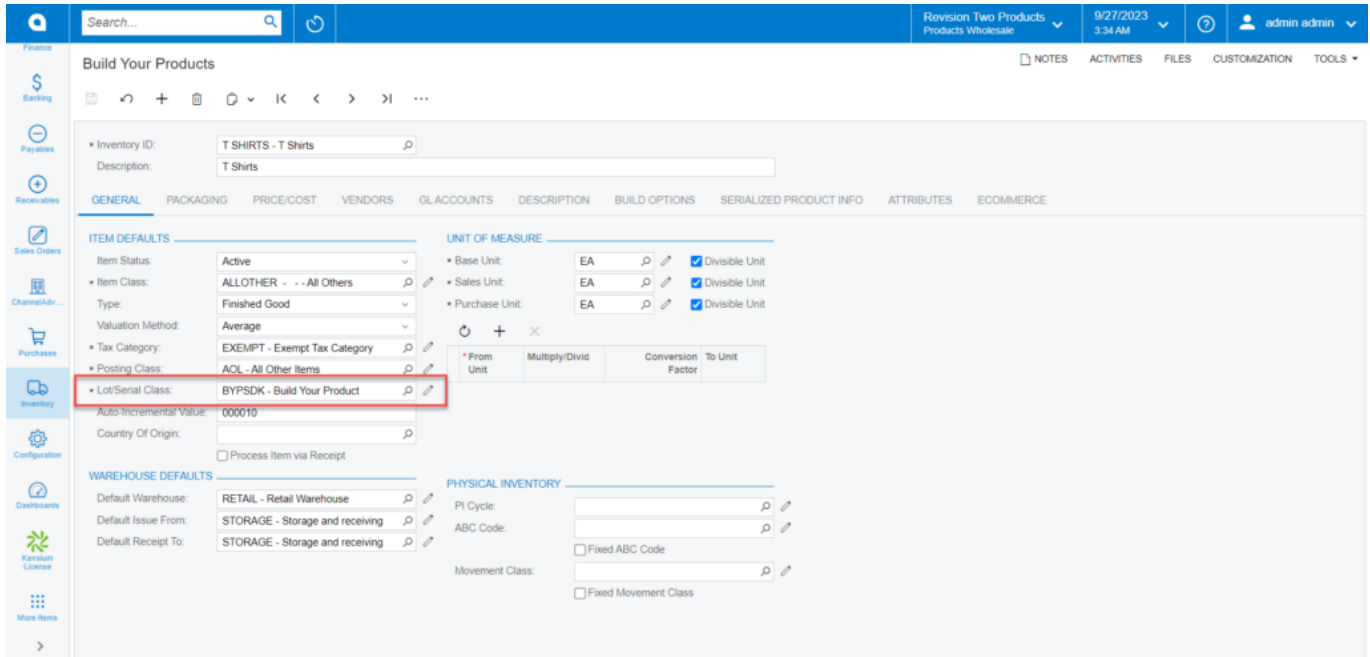

Mapping Lot/Serial Class

To track Build Your Product, click on pencil you will be redirected to the **[LOT/SERIAL CLASSES]** screen as shown below.

The screenshot shows the 'Build Your Products' interface. The 'Inventory ID' is 'T SHIRTS - T Shirts' and the 'Description' is 'T Shirts'. The 'Lot/Serial Class' field is highlighted with a red box and contains the value 'BYPSDK - Build Your Product'. The 'Unit of Measure' section shows 'Base Unit' as 'EA' and 'Sales Unit' as 'EA', both with 'Divisible Unit' checked. The 'Warehouse Defaults' section shows 'Default Warehouse' as 'RETAIL - Retail Warehouse', 'Default Issue From' as 'STORAGE - Storage and receiving', and 'Default Receipt To' as 'STORAGE - Storage and receiving'.

Lot / Serial Classes in the BYP browse

BYP Product must be associated with a Lot/Serial class with the below values. If these values are not set the application will show an error message and refer to the help page. The Help Page will have a section explaining the reason for these values.

| Field | Field Type | Description |
|--------------------|------------|--|
| Tracking Method* | Check box | Track Serial Numbers include the following option along with a checkbox. <ul style="list-style-type: none"> Track Expiration Date Required for Dropship. |
| Assignment Method* | Drop- Down | You will have two options in the drop-down. <ul style="list-style-type: none"> When Received (Default) When used |

| Field | Field Type | Description |
|---------------|------------|--|
| Issue Method* | Drop- Down | <p>You will have the following issue methods in the field.</p> <ul style="list-style-type: none"> • FIFO (First in First Out) • LIFO (Last in First Out) • Sequential • Expiration • User-Enterable <p>To generate the Issue method, you must select the [User-Enterable].</p> |

Enter the values for the Lot / Serial Class
