

Option Values

Option Values refers to the conduct it intends to pursue while applying price based on **Attribute Value**, **Pricing Type**, and **Price**.

- **Attribute Value** - A piece of information that defines the characteristics of a field to apply the pricing options such as color, size etc.
- **Pricing Type** - This field controls how the *pricing* should react in different scenarios such as **“Fixed Price”, “% On Base Price”, “Component Price”, “% On Component Price”**.
- **Price** - It lets you define the price to apply for the specifics at the time of purchase.
