

Non-Stock Items

The screenshot displays the Acumatica software interface. On the left, the 'Item Class Tree' lists various classes, with 'CHARGE' (Miscellaneous Charges) highlighted. The main panel shows the 'ATTRIBUTES' tab for the 'CHARGE' class. A table lists attributes with columns: Active, Attribute ID, Description, Sort Order, Required, Control Type, Category, Merchandising Section, Section Sort Order, Row Position, and Column Position. Two attributes are listed: 'AMCTOBAT Colors' and 'AMCTOBAT Length'. Below this, there are sections for 'Inventory ID Segment Settings' and 'Description Segment Settings', each with a table for segment configuration.

Item Classes

- The created **[Item Class]** is reflected under Item Class.
- Select the **[Item Class]**.
