Stock Items

- **[Component Quantity*Default price]** will be used to calculate Fixed prices.
- The **[Price]** Field will show the total of the parent item and two Child items and the same will be reflected in the stock items because of the automation schedulers.
- If the **[Price]** is not updating, navigate to left side panel of **[Acumatica]** select **[CommercePro]**, and then select **[Refresh Kit Price Process]** under **[Processes]**.

The screenshot displays the Fusion CommercePro user interface. At the top, there is a blue header bar containing a search field, a refresh icon, and user information (Revision Two Products, Products Wholesale, 11/22/2023 10:00 PM, admin admin). Below the header, a sidebar on the left lists various modules: Recorders, Customization, Sales Orders, Purchases, Inventory, Payroll, Dashboards, Commerce Connector, and CommercePro (which is highlighted with a red box). The main content area is titled 'Commerce Pro' and is divided into three columns: 'Processes', 'Inquiries', and 'Preferences'. The 'Processes' column contains a list of tasks, with 'Refresh Kit Price Process' highlighted by a red box. Other tasks in this column include 'Refresh Kit Price/Last Cost Proc...', 'Customer Order Summary', 'Process Customer Order Summary', 'Update Vendor Inventory', 'Update Inventory sales prices', 'Update Item Category based on ...', 'Branch Wise Inventory Association', 'S3 Images Processing', 'Calculate Kit Qty Process', and 'Process Quick Kits'. The 'Inquiries' column lists 'Dropship Mapping', 'Kit Assembly Logs', and 'ACM Vendor Inventory Details B...'. The 'Preferences' column lists 'Vendor Inventory', 'Customer Order Summary', 'Category Rules', 'CommercePro Feature Manage...', and 'Shipping Restriction Zones'. At the bottom of the main content area, there is a 'Show All' link with a dropdown arrow.

CommercePro

- You must enable the Radio Button.
- Click on **[PROCESS ALL]**.
