

Multi-Website Support

Merchants administering multiple websites can associate them with individual branches to ensure that inventory in Acumatica is mapped to the appropriate site. Retailers sell the products with multiple variations based on the region market or branch store. This allows retailers to track product sales according to the branch name.

The Impacted areas for Multi-Website Support are below.

- Branches
- Item Class
- Stock Items
- Non-Stock Items
- Template Items
- Customers
- Customer Class
- Sales Orders
