

Configuring KNCentralizedLicenseConsole

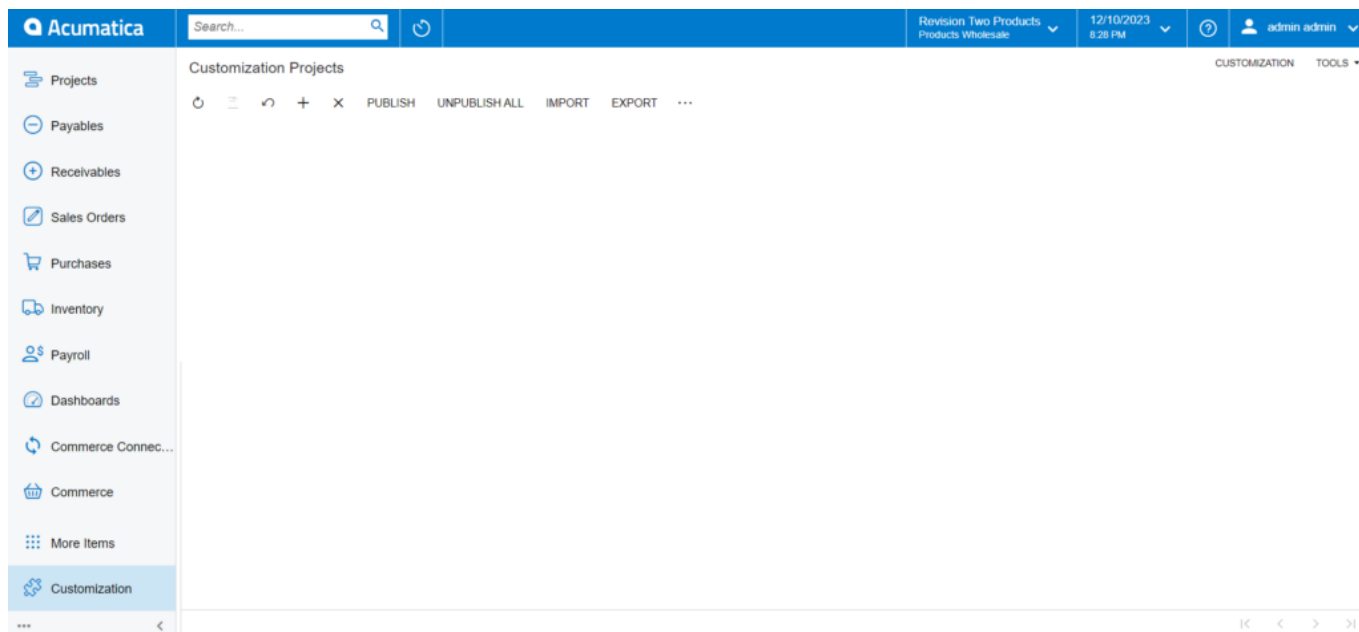

Centralized License Console, a potent solution for simplified license administration across our product line, is now **Available**. Whether you use one or more product packages, this integrated license module acts as a central hub for effectively managing licenses. A single download of this package will enable you to use the new module, which is available starting with version 23R1.

We are publishing the **[KNCentralizedLicenseConsole]** package in the instance.

- **New customers:** The New Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.
- **Existing Customers:** Before Publishing the new License packages, All the existing product packages should be updated with new Packages which are compatible with the new licensing engine.
 - A Clean-up Script will be run to remove all existing License tables.
 - The new Refactored **[KNCentralizedLicenseConsole]** package will be published in the client instance.

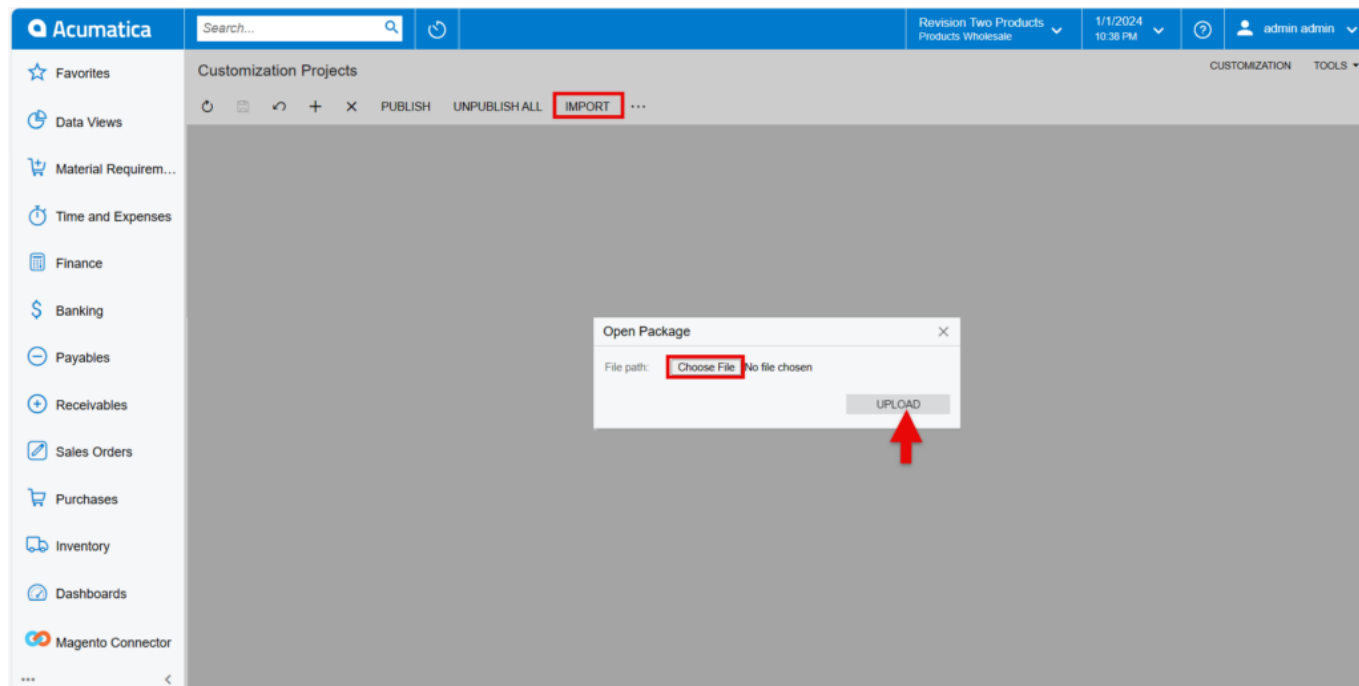

To configure the **[KNCentralizedLicenseConsole]**, you need to follow these steps.

1. Save the .zip file of the **[KNCentralizedLicenseConsole]** package to the local hard drive.
2. Click on the left panel in Acumatica and select **[More Items]**.
3. Click on **[Customization]**, and you will be redirected to the Customization Projects screen.
