

Managing Non-Stock Item

To access the non-stock item, go to the **[Inventory]** section on the left panel. Click on the **[Inventory]**, you will get an option **[Non-Stock Item]** under **[Profile]** as shown below.

Non-Stock Items under the Profile option

Click on **[Non-Stock Items]**, you will be redirected to the Non-Stock Items screen as shown below.

Non-Stock Items window

Field	Field Type	Description
Inventory ID	Text box	You must create an Inventory ID. If you have already created the [Inventory ID] then you need to search for the same.
Product Workgroup	Search box	Select the Product Workgroup from here.
Item Status	Drop-down	You need to select the Item Status from the existing records within Acumatica. You will have a couple of options in the drop-down. <ul style="list-style-type: none"> • Active • No Sales • No Purchases • No Request • Inactive • Marked for Deletion By default, you need to choose [Active] item status.
Product Manager	Search box	Select the respective Product Manager for the same.
Description	Text box	You need to describe the Inventory ID that you have created.

The screenshot shows the Acumatica interface for configuring a 'MEC KIT - Mec KIT'. The left sidebar contains navigation options like Material Requirements, Time and Expenses, Finance, Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, Magento Connector, Kensium License, and More Items. The main area displays the 'ITEM DEFAULTS' tab with fields for Inventory ID, Item Status, Description, Product Workgroup, Product Manager, and various unit of measure settings. A red box highlights the 'Is a Kit' checkbox under the 'Posting Class' field.

Tick the box to access the Kit Specification screen
