

Steps to enable KIT item quantity as variance in Acumatica

1. On the Kits Specifications screen, navigate to Non-Stock Components, choose the Component ID, and check the box for **“Allow Component Qty. Variance.”**

The screenshot shows the Acumatica interface for 'Kit Specifications'. The 'NON STOCK COMPONENTS' tab is selected. A table lists components, with the first row highlighted. The 'Allow Component Qty. Variance' checkbox is checked.

* Compon ID	Description	* UOM	Component Qty.	Allow Component Qty. Variance	Min. Component Qty.	Max. Component Qty.
> INDEXT...	Extended warranty	YEAR	2.00	<input checked="" type="checkbox"/>		

Allow component quantity variance

Note:

Other component items that are not identified as variance cannot be altered; the only alternative is to add new line items to the Sales order.
