

## Version 5.2.7

Release notes now include new features and bug fixes for all POS components. These components include:

- Fusion Register
- ASI ACU
- ASI Sage

### a) New Features

#### 916 ASI Sage - Promotional Pricing

- integration to make some limited promotional pricing items available at the register for POS transactions.

### b) Bug Fixes / Critical Improvements

#### 921 ASI ACU - FusionASI Downsync - Message: Object reference not set to an instance of an object

- Fix download customers in method UpsertCustomers.

#### 648 Fusion Register - Quote can be opened at multiple registers at the same time

- Validation is added to open the same quote in different Registries, in order to do so the permission of an administrator is required.

#### 686 ASI Sage - Incorrect AvaTax Calc in Sage 500 SOs created by Fusion ASI

- Fix was to add ASI configuration for separate Tax Schedules for 'Customer Present' and 'Customer Not Present' POS transactions.
