

Reset Password

Menu: Security / Settings / User Reset Password

Feature: Users

Editions: Cloud, Corporate, Store

This page configures whether POS users can reset their password.

The options are:

- Allow users to reset their password
 - If enabled, the user can reset their password from the login page if they have forgotten a previous password.
 - After the user initiates the reset password action, POS sends a verification email to the user.
 - The email contains a secure link that, when clicked by the user, will take the user to a Reset Password page on the POS site.
 - The link expires after a short time.
 - The user can provide a new password using the Reset Password link.
- Use site theme
 - This should be enabled.
