Printing FAQs

What size of item or bin label can I use?
Fusion has a catalogue of item and bin label formats which can be used out of the box for customers. If you would like a custom label, the Fusion team can quote you a price per label.

What format can the label be in?
Fusion will generate labels in a .zpl (Zebra Print Language) format.

What types of label printers can I use?
Fusion supports a wide range of printers, please contact them to ensure your model is supported. Fusion recommends the Zebra 420 model printer.

If I purchase FusionWMS Printing how many users can access it?
Licensing for FusionWMS Printing is based on the number of machines it is installed on, not by the user.
