

Steps to Verify the Published PayPal Payflow Packages

Once the customization package is installed, the connections must be established between Acumatica and the PayPal Payflow.

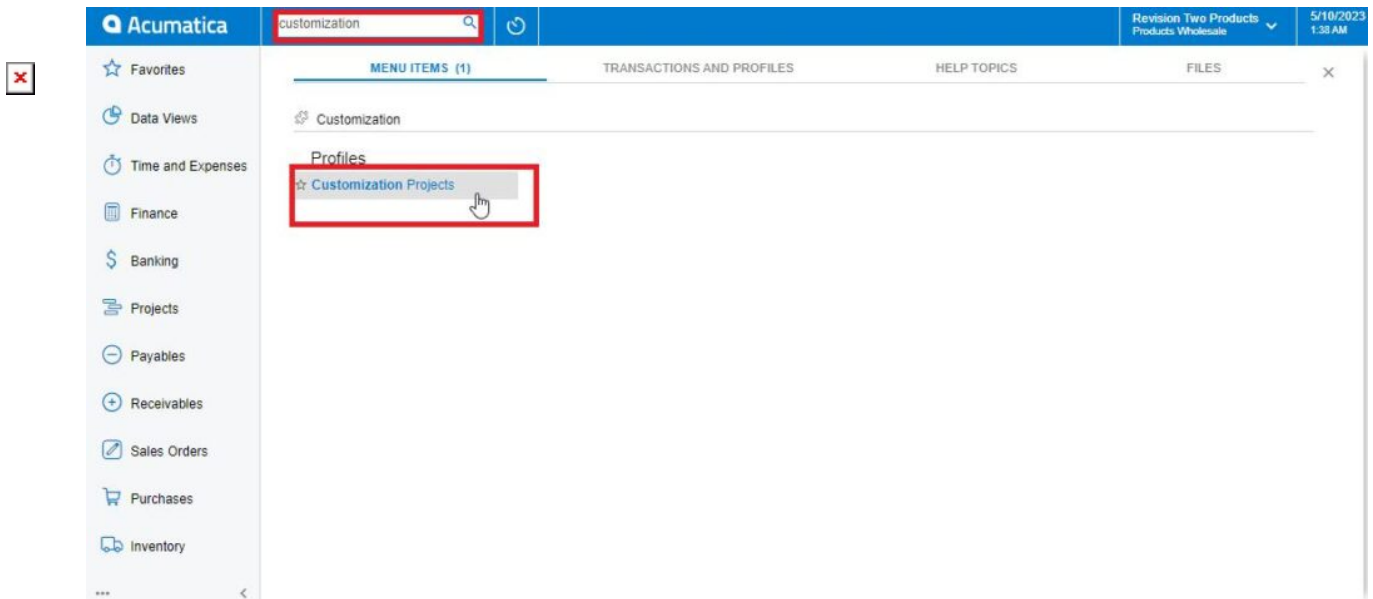

1. To verify the published package, navigate to the left menu in Acumatica ERP, click **Customization**, and select **Customization Projects**.

Customization-Projects

OR

Type the keyword “**Customization Project**” in the universal search bar.

Customization-Projects

- The application directs you to a Customization Projects screen, where you can review and validate the published packages.
