

Verifying the Published Packages

Once the customization package is installed, the connections must be established between Acumatica and PayPal Payflow.

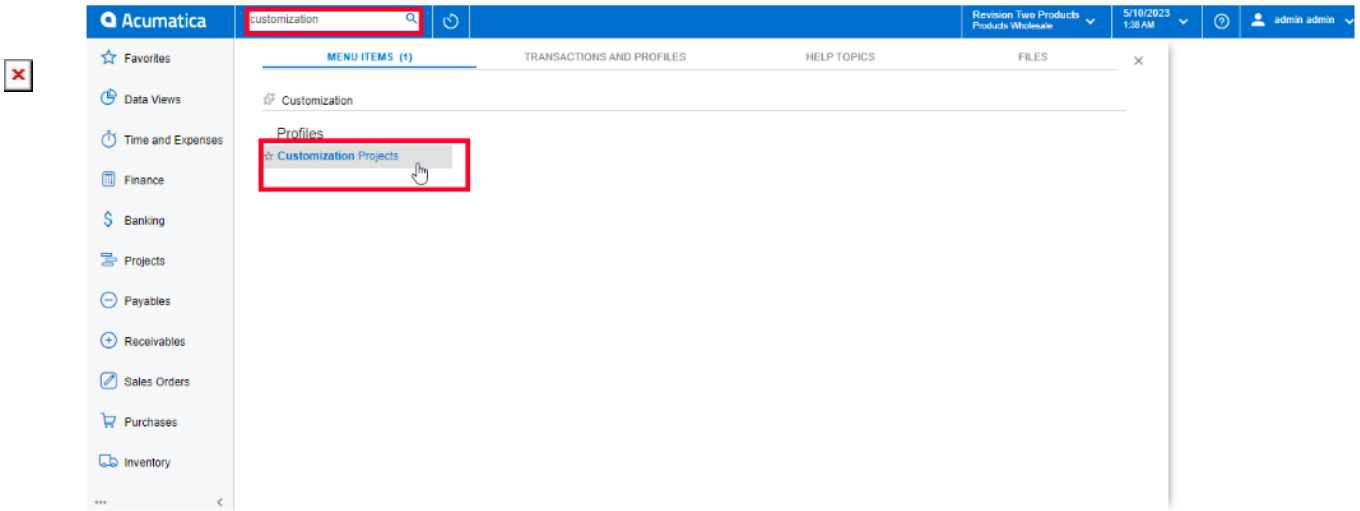

1. To verify the published package, navigate to the left menu in Acumatica ERP, click **Customization**, and select **Customization Projects**.

Customization Projects

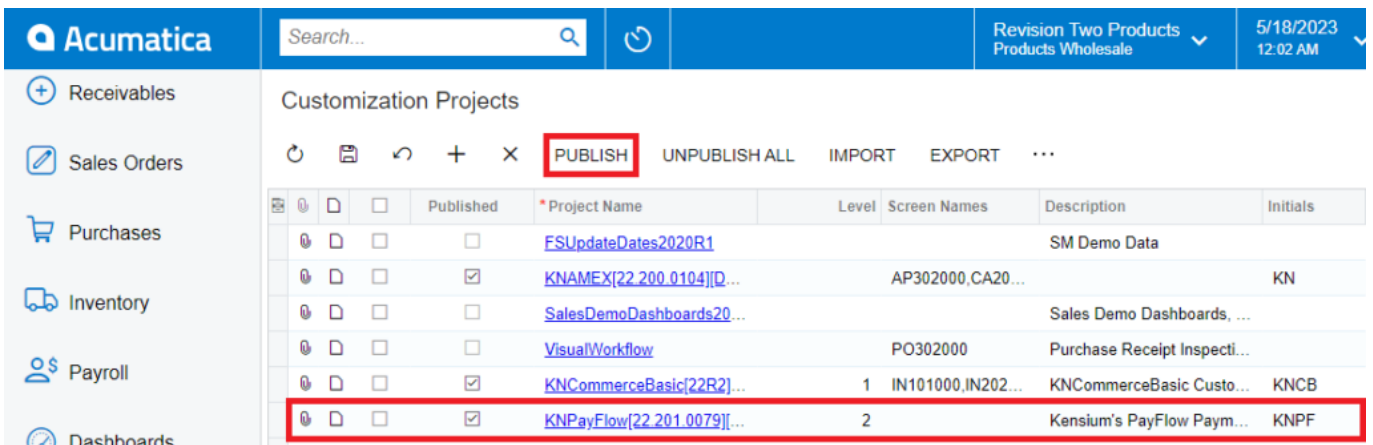

OR

Type the keyword “**Customization Project**” in the universal search bar.

Customization Projects

- The application directs you to a Customization Projects screen, where you can review and validate the published packages.

The screenshot shows the 'Customization Projects' screen in Acumatica. At the top, there is a search bar and a 'PUBLISH' button highlighted with a red box. Below the search bar is a table with the following columns: Published, Project Name, Level, Screen Names, Description, and Initials. The table contains several rows, with the last row highlighted by a red box.

Published	Project Name	Level	Screen Names	Description	Initials
