

Classification Mappings

The practice of transferring Acumatica classifications to Rithum Connector Classifications is known as classification mapping. This key step guarantees that products are correctly classified based on their Acumatica classifications when they are offered on marketplaces via Rithum Connector.

Create Item Class and Classification in Acumatica and Rithum

You need to navigate to the left panel of Acumatica and click on **[Rithum]** then click on **[Classifications mapping]** under **[Preferences]**.

Channel Advisor screen

- You will be redirected to a **[Classification Mapping]** screen.

Classification Mapping

Upon opening the screen, you can view.

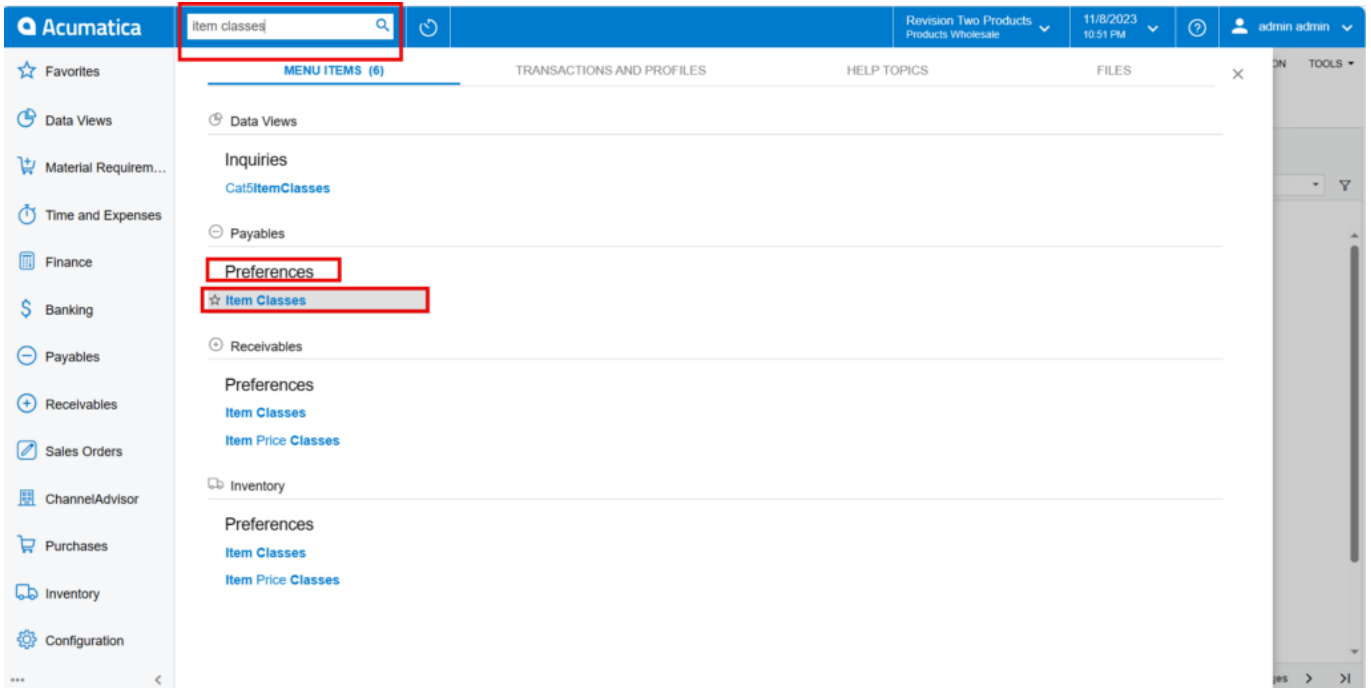

REFRESH LIST OF CLASSIFICATIONS: If you create any item class in Rithum Connector it will be available in Classification in Acumatica.

INIT ITEM CLASSES: If you create any item class in Acumatica it will synchronize to Acumatica and will be available in Item Classes.

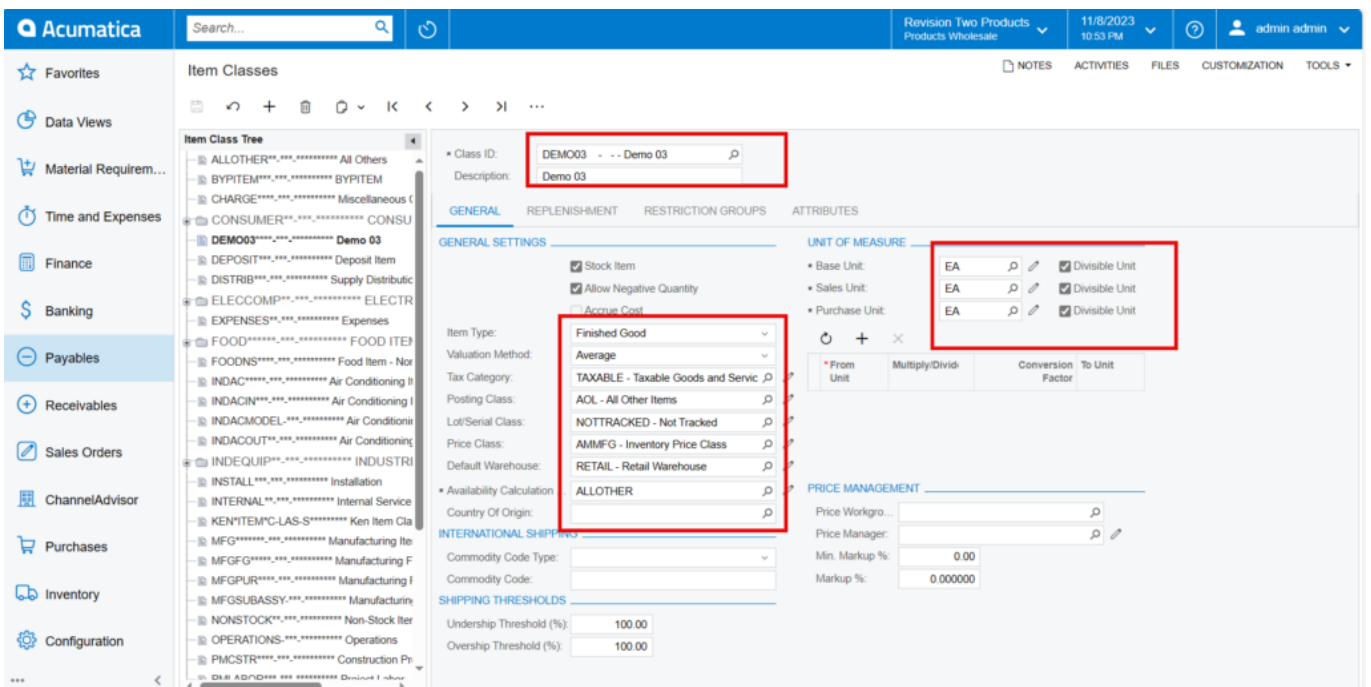

- You need to select the store from the **[Store]** selector.

Creating Item Classes

You need to search for **[Item classes]** in the Global search bar. Click on **[Item classes]** under **[Preferences]** then you will be redirected to item class screen in Acumatica.

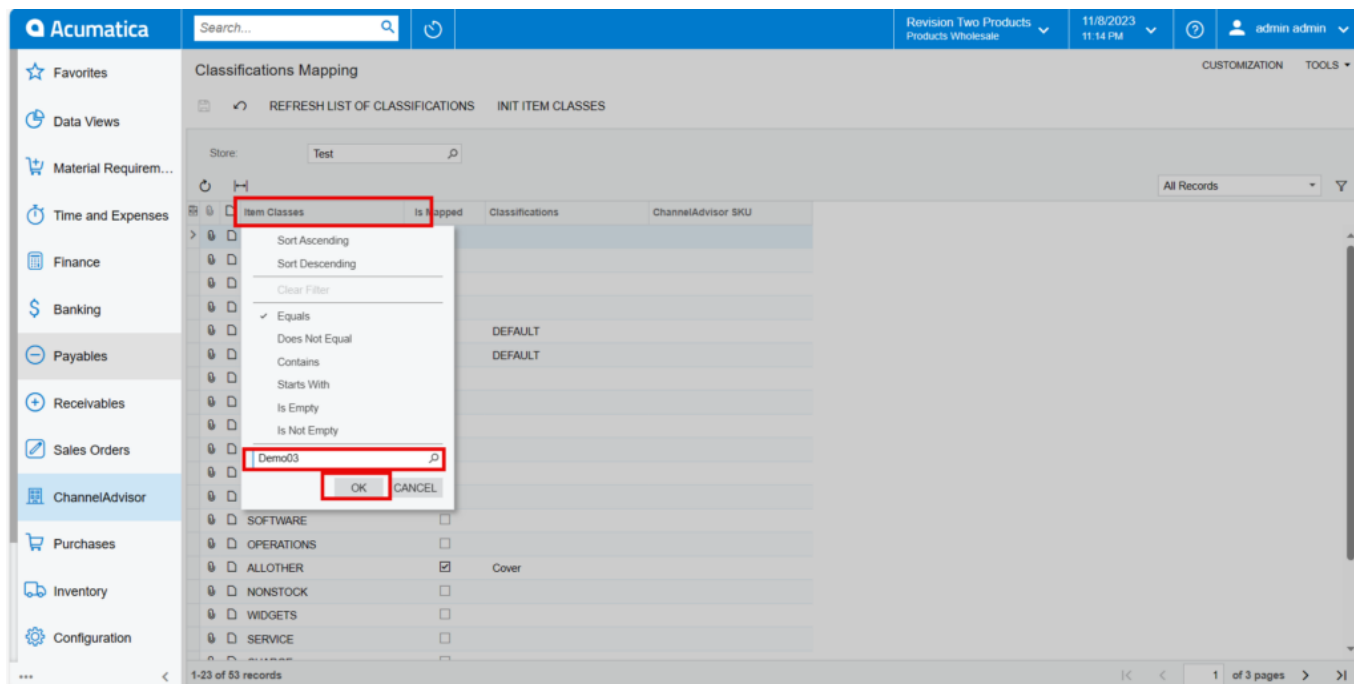

Item Classes

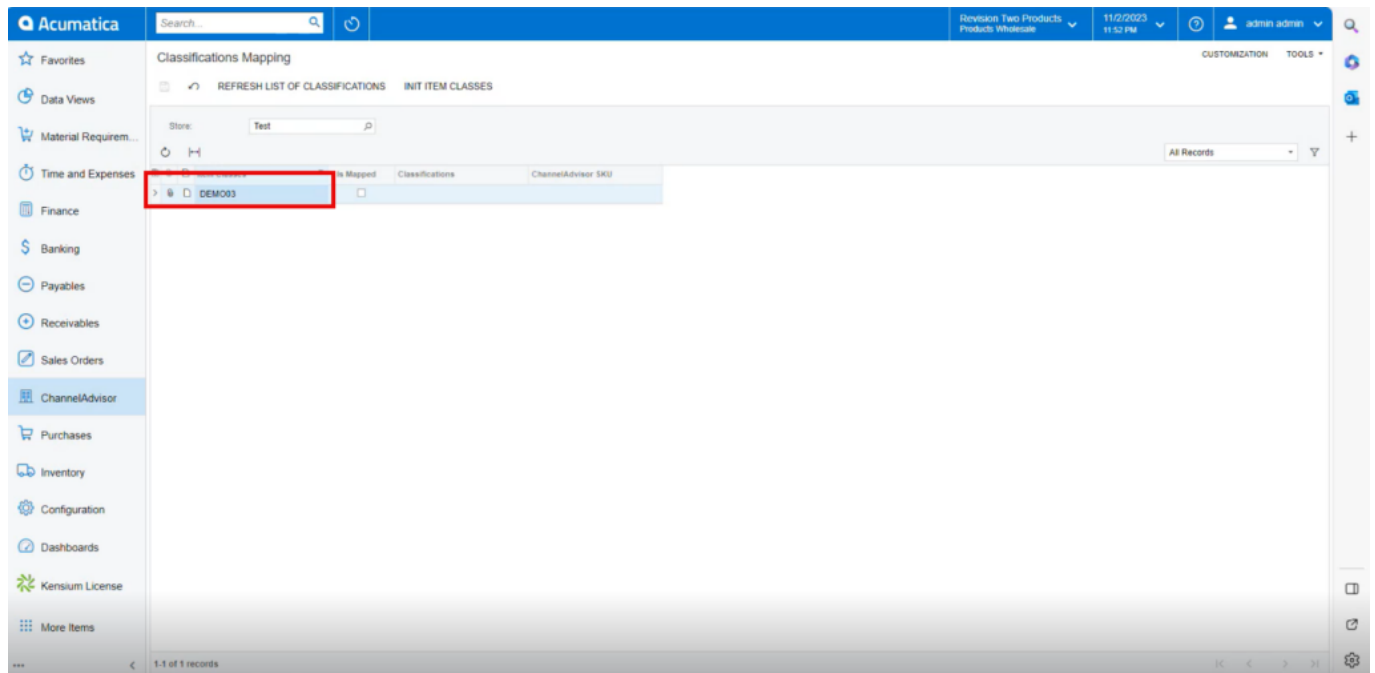

Item classes

- 
 - You need to enter the name of item classes in **[Class ID]**.
 - You must provide the description of the item class in the **Description** Field.
 - In the General settings and unit of measure add the following details

Demo03

Classification Details
You may classify your products by assigning them to a class. Products in a classification can be assigned different shipping rates and schedules.

* Classification Name: Demo03

Attributes
Describe features in common with all products in this Classification. For example, the Camera classification may have attributes such as Lens, Body Weight, Flash, etc. [Manage Attributes](#)

Classification Detail Screen

- Click on **[Create New Classification]**.
- You need to enter the **[Classification Name]**.
 - The Classification Name must match with item class in Acumatica.
- Click on **[Save]**.
- You can view a validation message labeled **[Saved Successfully]** on the screen.

Mapping Classification in Acumatica

- You need to Navigate to left panel of Acumatica and click on **[Rithum Connector]** then click on **[Classifications mapping]** under **[Preferences]**.
- Click on **[Refresh List of Classifications]**.

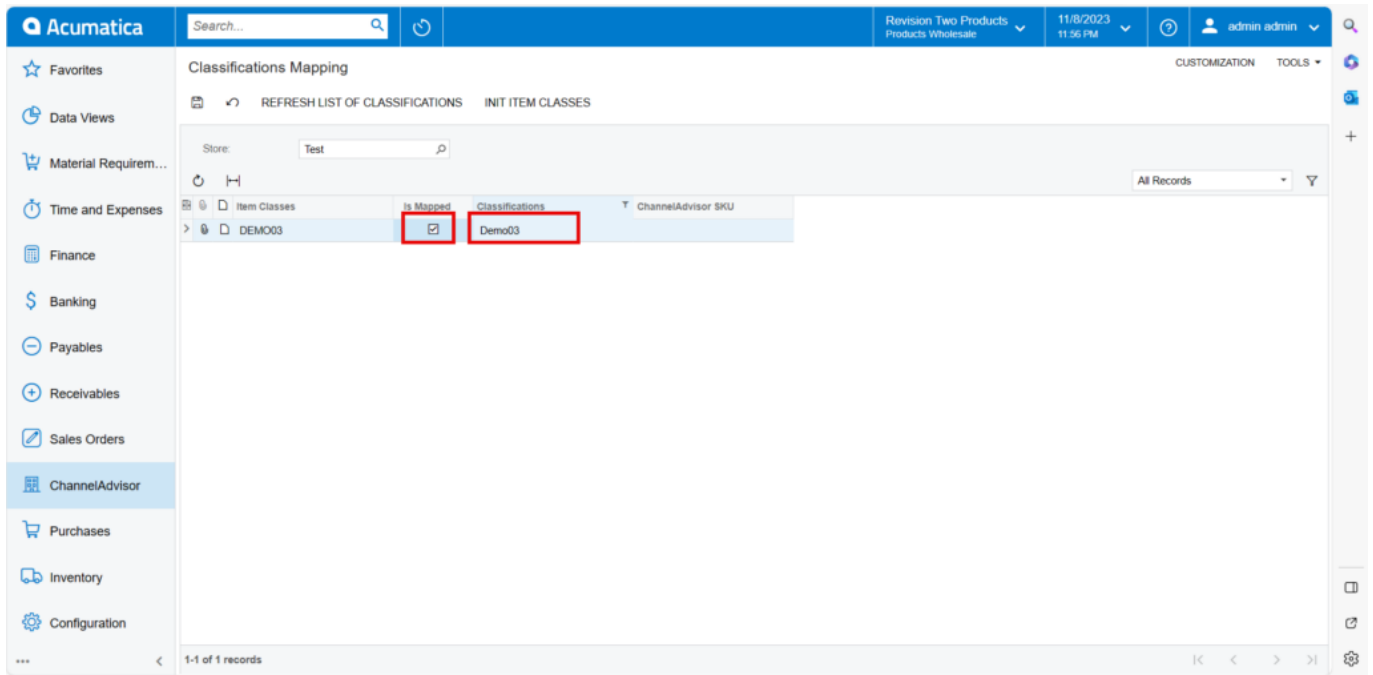

Upon clicking Refresh, it will update the **[Classifications list]** from Rithum Connector.

The screenshot shows the 'Classifications Mapping' screen in Acumatica. The left sidebar contains navigation links for Favorites, Data Views, Material Requirement..., Time and Expenses, Finance, Banking, Payables, Receivables, Sales Orders, ChannelAdvisor (selected), Purchases, Inventory, and Configuration. The main area displays a table with columns: Item Classes, Is Mapped, Classifications, and ChannelAdvisor SKU. The 'ELECComp' item class is selected, and a dropdown menu is open showing comparison operators: Sort Ascending, Sort Descending, Clear Filter, Equals (checked), Does Not Equal, Contains, Starts With, Is Empty, and is not empty. The 'is not empty' operator is highlighted with a red box, and the search field below it contains 'Demo03'. The 'OK' button is also highlighted with a red box. The top bar shows 'Acumatica', a search bar, and user information 'admin admin'.

Classifications

- You need to search for the created classification that corresponds to the item class, From the list.

Toggle the Checkbox

- You can view Created **[Item Class]** under **[Classifications]** in Acumatica.
- To perform the sync, the classification name **MUST** be entered **EXACTLY** as it appears in Rithum Connector.
- You must Enable the **[Is Mapped]** radio buttons to synchronize the stock item from Acumatica to Rithum Connector.
- Click on **[Save]** to establish the connection between Item Classes and Classifications.
- In the Rithum Connector SKU field, enter a base SKU (Store Keeping Unit) for the Classification.
- Entering a SKU into this field will become a base SKU for reference to this Classification. All Attributes for that classification will be mapped to this base SKU.
- Click on **[Save]**.
