

Marketplace settings usually pertain to configurations and preferences related to online marketplaces where you might sell products or services. This could include platforms like Amazon, eBay, or others.

Rithum Connector acts as a centralized platform that helps you manage orders from various marketplaces in one place. When you integrate your online stores or marketplaces with Rithum Connector.

Connect your different online channels (marketplaces, web stores, etc.) to Rithum Connector.

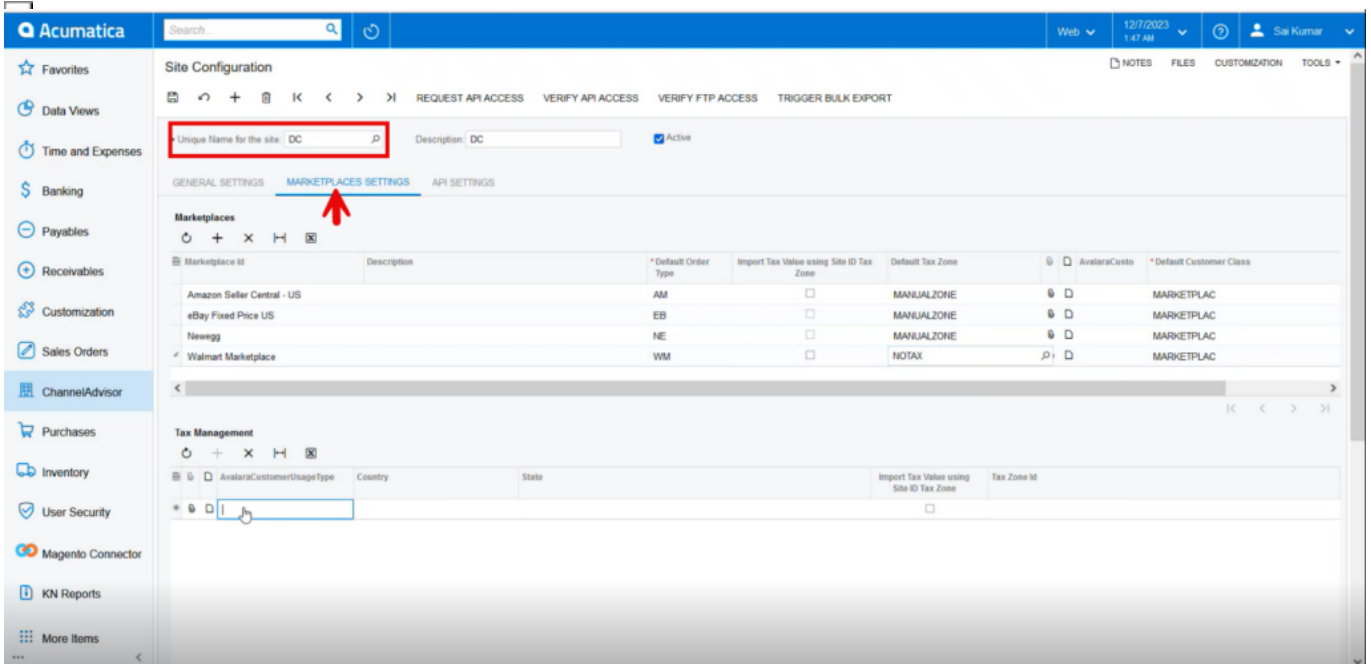

Provide necessary credentials and permissions for each integrated channel.

- Rithum Connector regularly pulls order data from the integrated channels.
- Aggregated order information is then centralized within the Rithum Connector dashboard.
- You can view, process, and manage orders from different marketplaces in one interface.
- Utilize Channel Advisor's Connector tools for order fulfillment, tracking, and other related tasks.
- Rithum Connector often supports real-time updates, ensuring that changes in inventory, pricing, and order status are reflected promptly across integrated channels.

The marketplace Settings offers you the option to choose the [Marketplace ID] and specify its purpose. If you want to have a separate customer class for each sort of order, you can add it here.

- Click on  icon.
- Select the below Option from the existing Menu:
 -  It is a unique ID assigned to each marketplace integrated with the platform. This ID helps the system distinguish between different marketplaces and manage their settings separately.
- Click on  icon.
- Search for Marketplace ID.
 -  It is a specification assigned to orders by default. This could include the order processing method, shipping options, payment terms.
- Select the  from the menu.
 -  Import Tax from Rithum Connector in marketplace involves tax parameters within Rithum Connector and ensuring that this information is accurately transmitted to the marketplaces.
- You can enable the check box if you want to import the tax ID.
 -  Default tax zone in marketplace settings typically involves specifying the zone for tax purposes.
- Select the  .
-  Default customer class in marketplace settings involves defining the

default attributes assigned to customers. Select the 

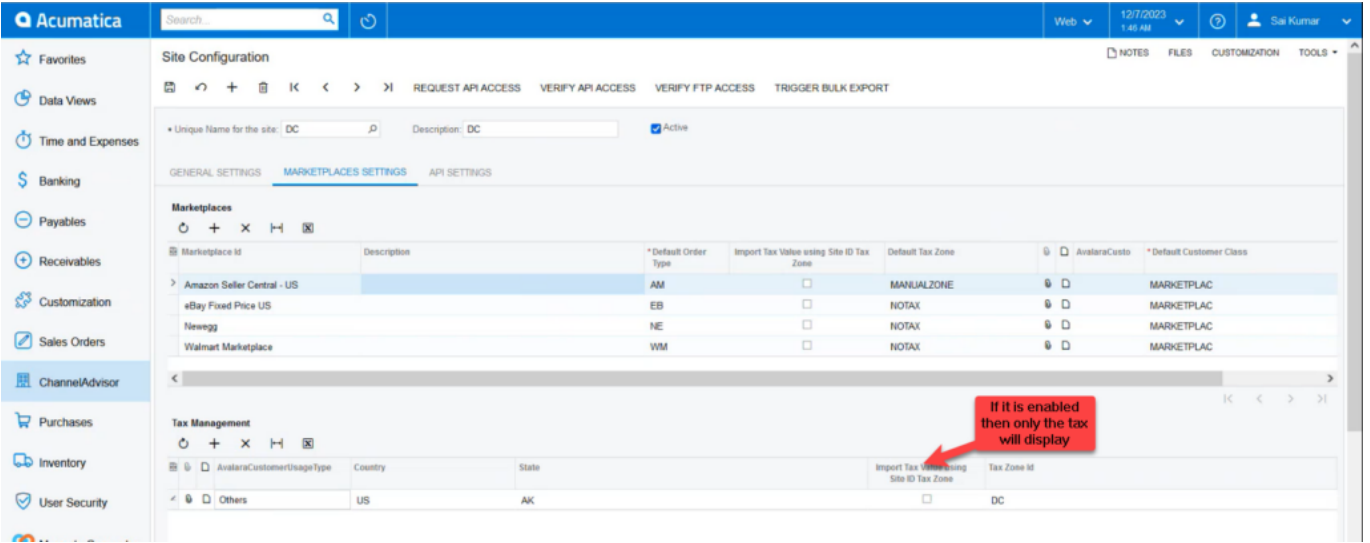

Marketplace Settings

You can configure tax settings within Rithum Connector to comply with tax regulations.

You have the feasibility to select tax for specific marketplace with specific country and the orders will sync with the specific tax zone. And if no tax zone is selected the order will sync with manual tax zone.

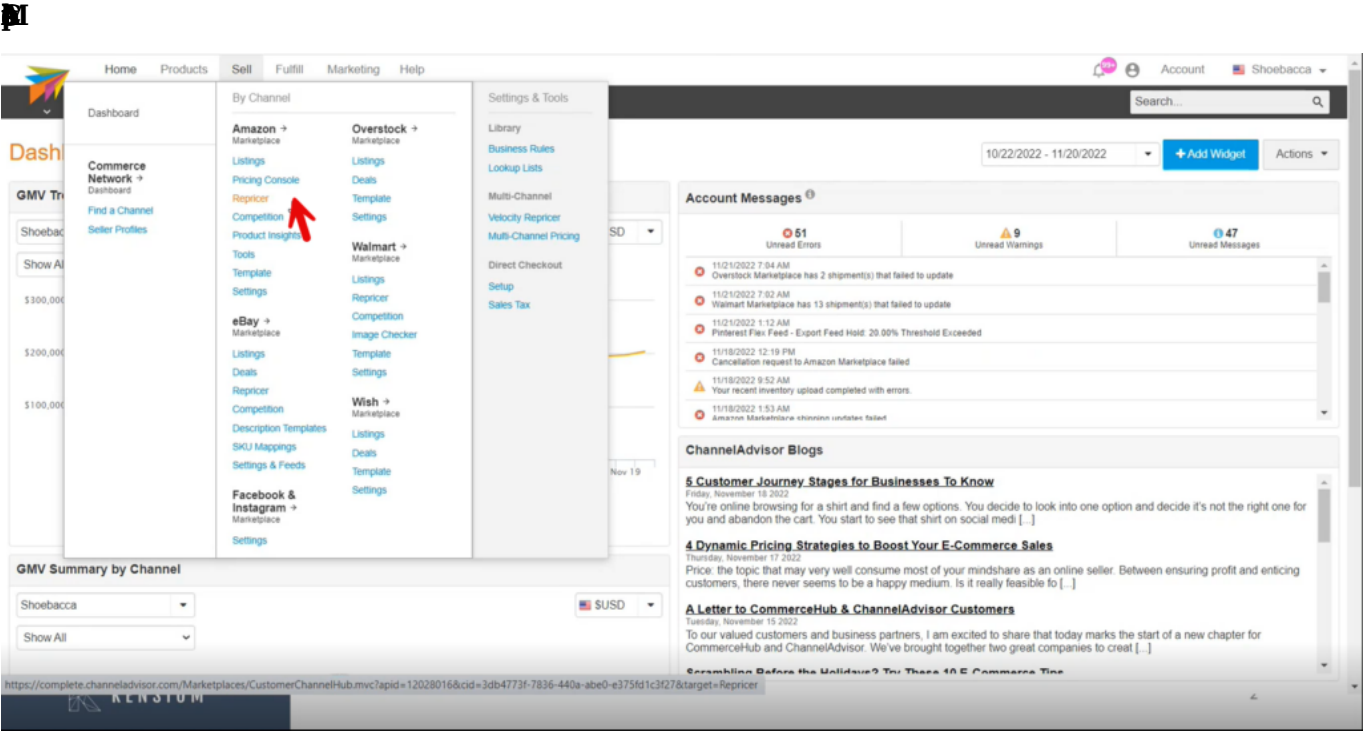

- Click on  icon under tax management.
- Select , , 
- Select 

The screenshot shows the 'Site Configuration' page in Acumatica, specifically the 'Marketplaces Settings' tab. A table lists various marketplaces with columns for Marketplace Id, Description, Default Order Type, Import Tax Values using Site ID Tax Zone, Default Tax Zone, and Default Customer Class. A red callout box points to the 'Import Tax Values using Site ID Tax Zone' checkbox for the 'Amazon Seller Central - US' marketplace, with the text: 'If it is enabled then only the tax will display'.

Marketplace Id	Description	* Default Order Type	Import Tax Values using Site ID Tax Zone	Default Tax Zone	AvatarCusto	* Default Customer Class
> Amazon Seller Central - US		AM	<input type="checkbox"/>	MANUALZONE	<input type="checkbox"/>	MARKETPLAC
eBay Fixed Price US		EB	<input type="checkbox"/>	NOTAX	<input type="checkbox"/>	MARKETPLAC
Newegg		NE	<input type="checkbox"/>	NOTAX	<input type="checkbox"/>	MARKETPLAC
Walmart Marketplace		WM	<input type="checkbox"/>	NOTAX	<input type="checkbox"/>	MARKETPLAC

Tax Management

The screenshot shows the ChannelAdvisor interface for 'Marketplace in CA'. The left sidebar lists various marketplace settings for Amazon, Overstock, Walmart, eBay, and Wish. The 'Repricer' option for Amazon is highlighted with a red arrow. The main content area shows 'Account Messages' with a list of error notifications, including 'Overstock Marketplace has 2 shipment(s) that failed to update' and 'Walmart Marketplace has 13 shipment(s) that failed to update'. Below the messages are 'ChannelAdvisor Blogs' with titles like '5 Customer Journey Stages for Businesses To Know' and '4 Dynamic Pricing Strategies to Boost Your E-Commerce Sales'.
