

# Site Configurations

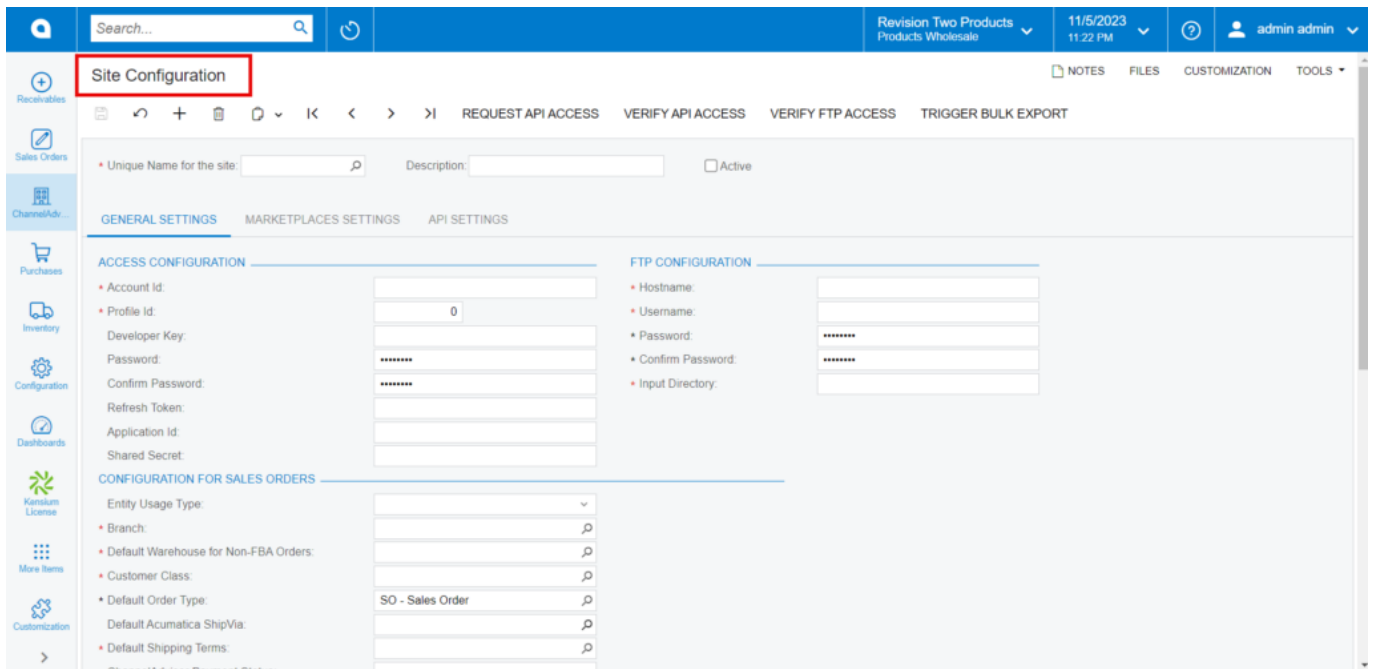

Through site configurations, Businesses can establish the behaviour and synchronization criteria for data communication, as well as how Acumatica should interact with Rithum Connector, through site configurations.

- You need to Navigate to the left side Panel in **[Acumatica]**, click on **[Rithum Connector]** look for **[setup]** submenu and select **[Site Configuration]**.

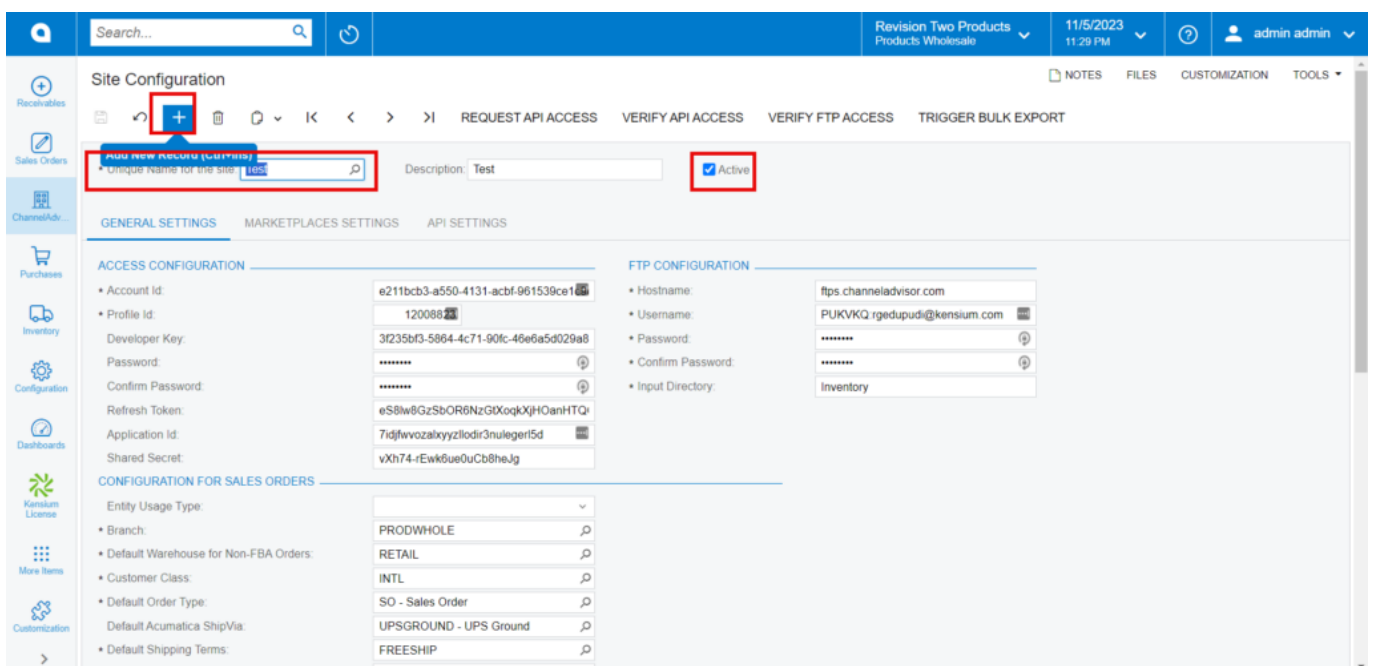

Select Site Configuration

- You will be redirected to the following screen.

The screenshot shows the 'Site Configuration' screen in the Fusion Rithum Connector application. The top navigation bar includes a search bar, a refresh icon, and user information (Revision Two Products, Products Wholesale, 11/5/2023 11:22 PM, admin admin). The left sidebar contains various icons for Receivables, Sales Orders, Channel Adv., Purchases, Inventory, Configuration, Dashboards, Kensium License, More Items, and Customization. The main content area is titled 'Site Configuration' and features a red box around the title. Below the title, there are tabs for GENERAL SETTINGS, MARKETPLACES SETTINGS, and API SETTINGS. The GENERAL SETTINGS tab is active, showing fields for Unique Name for the site, Description, and Active checkbox. Below these are sections for ACCESS CONFIGURATION and FTP CONFIGURATION. The ACCESS CONFIGURATION section includes fields for Account Id, Profile Id, Developer Key, Password, Confirm Password, Refresh Token, Application Id, and Shared Secret. The FTP CONFIGURATION section includes fields for Hostname, Username, Password, Confirm Password, and Input Directory. At the bottom, there is a section for CONFIGURATION FOR SALES ORDERS with fields for Entity Usage Type, Branch, Default Warehouse for Non-FBA Orders, Customer Class, Default Order Type, Default Acumatica ShipVia, and Default Shipping Terms.

Site Configuration Screen

The screenshot shows the 'Site Configuration' screen with a red box around the 'Add New Record (+)' button. Below this button, there is a red box around the 'Unique Name for the Site' field, which contains the text 'Test'. The 'Active' checkbox is also checked and highlighted with a red box. The rest of the screen is the same as the previous screenshot, showing the configuration fields for ACCESS CONFIGURATION, FTP CONFIGURATION, and CONFIGURATION FOR SALES ORDERS.

Select a Unique name for the Site

- Click on **[+]** icon.
- You need to search for the **[unique Name for the site]** to create your store.
-  • You need to provide the **[Description]**.
- Locate the **[Active]** checkbox and click on it to enable the site and make it accessible for configuration.
- Click on the **[General Settings]** within the Site Configuration screen. This tab contains options to configure various aspects of the site there are:
  - Access Configuration
  - FTP Configuration
  - Configuration For Sales Orders
