

SellerCloud Connector Package

The first step to install the feature is to run the latest version of the Kensium commerce Framework, SellerCloud Connector.

Steps to Install

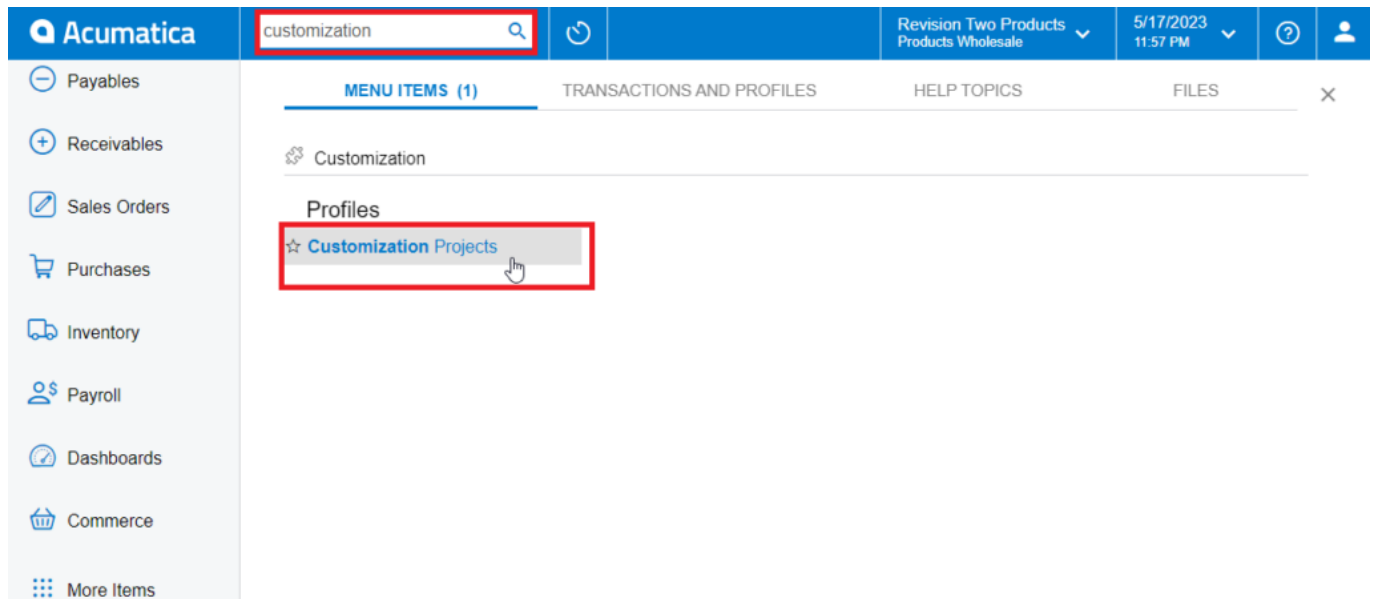

- You need to Save the .zip file of the **[SellerCloud Connector]** , **[KCF]** package to the local hard drive.
- Go to the left navigation panel in Acumatica and choose **[More Items]**.
- Click on **[Customization]**.

Customization Projects

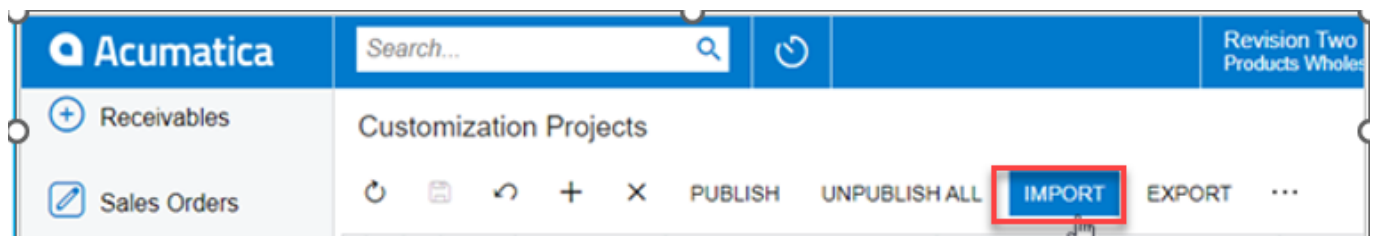

[OR]

- You need to type the keyword **[Customization]** in the Global Search Bar.

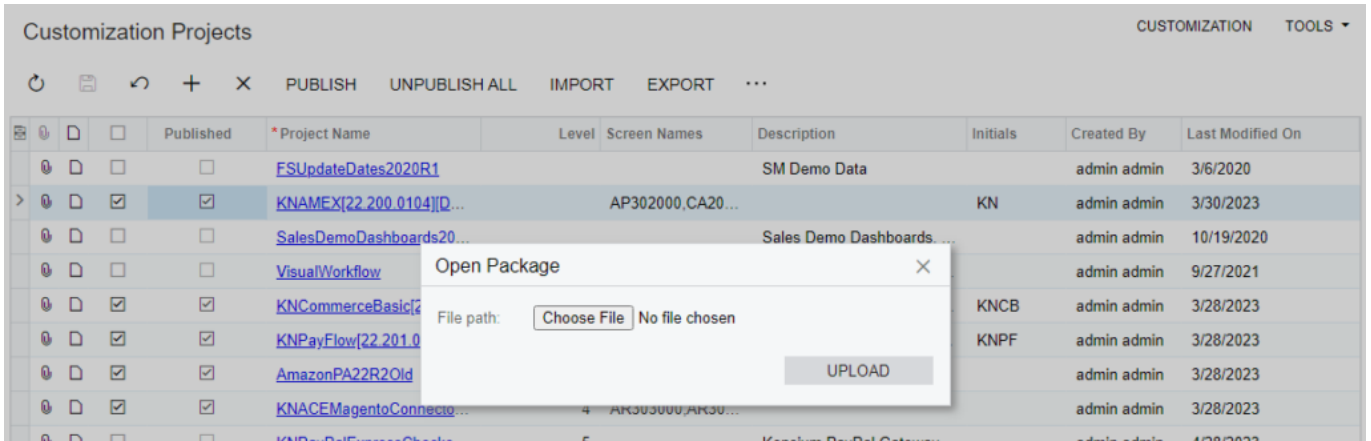

Customization Projects through the search bar

- Click on **[Customization Projects]**.
- Click on the **[Import]** button.

Import product package

- Select the SellerCloud Connector Package and KCF Package .zip file from a local folder.
- Click on **[Upload]**.

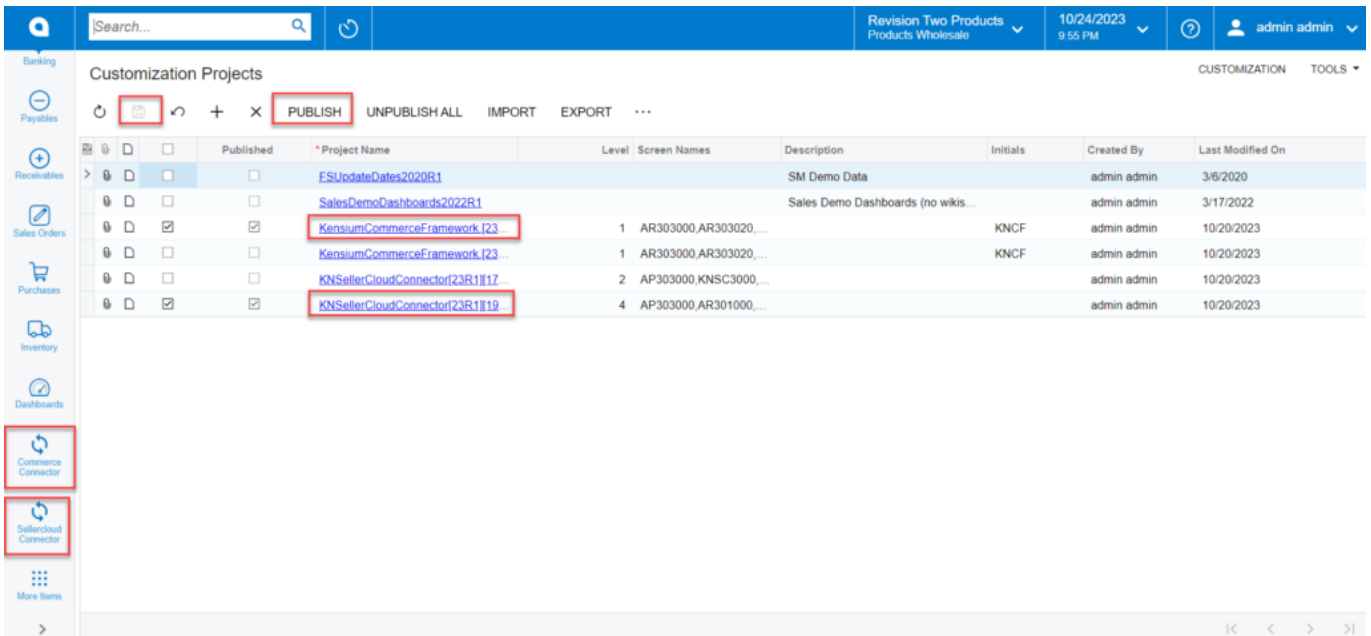

The screenshot shows the 'Customization Projects' interface. A table lists various projects with columns for Published status, Project Name, Level, Screen Names, Description, Initials, Created By, and Last Modified On. An 'Open Package' dialog box is open, showing a file path and a 'Choose File' button. The 'PUBLISH' button is highlighted in the top navigation bar.

Upload product package from local desktop

- The file name will appear in the **[Project Name]** column.
- You need to Specify the level at which the package needs to be released below the Customization projects.
- Kensium's Commerce Framework
- SellerCloud Connector
- You need to toggle the box on publishing.

The screenshot shows the 'Customization Projects' interface with a sidebar on the left containing navigation options like Banking, Payables, Receivables, Sales Orders, Purchases, Inventory, Dashboards, Commerce Connector, and Sellercloud Connector. The 'PUBLISH' button is highlighted in the top navigation bar. The table lists various projects, with some project names highlighted in red boxes.
