

Endpoint URL

Endpoint URL refers to web address or API end point, where data is sent or received during the integration. This URL allows Acumatica to communicate with SellerCloud Connector.

- Every screen will automatically have the endpoint URL filled up here as you provide data in each screen.

The screenshot shows the 'Connector Configurations' page for 'SC23R1'. The 'ENDPOINT URL' tab is active, displaying a table with the following data:

Action Type Description	Entity URL
Companies Sync	rest/api/companies
Product Types Sync	rest/api/Catalog/ProductTypes
Attributes List Sync	rest/api/Products/CustomColumns
Payment & Credit Terms ...	rest/api/Settings/PaymentTerms
