New Features and Enhancements

Empty Cache on Handheld on Logoff

In any of the [Pick Function] on the Handheld, we have added a message to warn a user that exiting the pick function like Cancel will result in losing uncommitted picks. This message applies to the [Shipping] module that includes the following.

- [PICK]
- [PICKPACK]
- [MULTIPACK]
- [QUICKPACK]

Figure: New Validation Message

Illustration:

The pop-up is introduced in **[PICK], [PACK], [PICKPACK], [MULTIPACK]** and **[QUICKPACK]** screens.

Primary Location field added in Item Check Module

In a prior release, we added the ability to define a primary location for an item in the Item Warehouse Detail. This has not been extended to the handheld in both the Item Check and Put Away Functions.

the [Item Warehouses Details] under the General Tab check for the Primary Location. The same will be reflected on the Handheld.

Installation Changes

There are no installation changes included in this release.

UI Changes

In the Fusion Warehouse Preferences under Fusion WMS, the Zone tab feature that was previously in the Warehouses section has now been moved to Fusion Warehouses Preferences.

Known Bugs and Issues Fixes

- We have resolved an issue in the WMS PACK Module. After creating a Sales Order and a shipment for the same and clicking on the [PACK] option and commit button, the application threw an error message on the [PACK] screen.
- We have resolved an issue with the [Shipment] screen. Under the ellipses [...] button, there is an option for [Correct Shipment]. The application threw an error message upon clicking on [Correct Shipment].
- We have resolved an issue with the Down Stock button in the [Purchase Order] while the Action Type is [Create Shipment]. By selecting the open order/orders and clicking on the [Down Stock] button the application throws an error message instead of a popup.

- We have resolved an issue with the [Commit] button in the Pick Screen. On the Pick Screen of the Handheld, the application was throwing an error.
- We resolved an issue with the [Print Shipment] from the [Process Shipment] screen when the [Print Shipment Confirmation] action was selected, the application was throwing an error message.
- We have resolved an issue on the [Process Shipment] screen. The [Created On] column was not visible due to some error in the application.
- We have resolved an issue regarding the Sales Order Screen. After clicking on the [Create Shipment] button an object reference error message appeared on the Sales Order screen.
- We have resolved an issue on the [Warehouse] screen where the [Zone Picking] checkbox was not visible.
- An issue in the Quick Pack module of the Handheld has been resolved. Previously, after entering the Box ID, the Quantity field was visible instead of the Item.
